JAN 20 2016

Mr. John Kieling, Chief
Hazardous Waste Bureau (HWB)
New Mexico Environment Department (NMED)
2905 Rodeo Park Road
Santa Fe, New Mexico 87505

Dear Mr. Kieling

Please find attached, *Work Plan for The Bulk Fuels Facility Expansion of the Dissolved-Phase Plume Groundwater Treatment System Design, Solid Waste Management Unit ST-106/SS-11,* Kirtland Air Force Base, New Mexico. This plan describes tasks related to the design and installation of groundwater extraction, observation, and monitoring wells; installation of injection wells; expansion of the treatment train in the groundwater treatment system to treat the ethylene dibromide (EDB) dissolved-phase plume; operation and maintenance of this system; and groundwater monitoring. The planned work is part of the overall interim measure to collapse the EDB dissolved-phase plume and to contain the mass flux of EDB from the source area.

If you have any questions or concerns, please contact Mr. L. Wayne Bitner at (505) 853-3484 or at ludie.bitner@us.af.mil or Ms. Victoria Branson at (505) 846-6362 or at victoria.branson@us.af.mil.

ERIC H. FROEHLICH, Colonel, USAF
Commander
