Santa Fe County Water Fair, 2009 (test results for selected parameters, revised January 13, 2010)

Yellow Highlights human-health standards used for comparision, test results exceeding a health standard, and wells with unhealthy test results.
Green Highlights aesthetic or irrigation standards used for comparision, test results exceeding a standard, and wells with high test results.
Wells with high test results for both health and non-health parameters also are highlighted in yellow.
* Sample ID codes that end with "DUP" are duplicates of the same sample listed in the row above, that were analyzed separately for quality control.
** See attached map of Field Areas. Water samples that had undergone treatment are not representative of groundwater quality and are listed sparately.
"EPA MCL" refers to Maximum Contaminant Levels set by the U.S. Environmental Protection Agency for public water systems.
"WQCC" refers to groundwater standards set by the N.M. Water Quality Control Commission.
