Subject: Draft LANL Consent Order
Date: Tuesday, May 31, 2016 11:50:06 AM

My comment on this 2016 Consent Order:

It seems to me that the purpose and intended consequences of this Consent Order are to eliminate the ability of NMED and the residents of New Mexico to pressure DOE to fulfill its responsibility for cleaning up the radioactive and hazardous waste moving in the soil and water from LANL's Cold War activities. NMED needs to keep the pressure on based on the requirements of 2005 Consent Order. Therefore, I oppose this "Campaign Approach" as underhanded!

It is imperative that we, New Mexicans, are updated on all progress of this clean up or the lack thereof. Compliance dates must be set. Our right to make comment must be preserved. And in the event of violations our Attorney General should be consulted for consideration of legal actions.

Sincerely,
Don Hyde
