

Recent Progress

Expert working groups* have been created and are making progress to:

- Fill critical data gaps;
- Define the physical, chemical, and biological processes that influence the contamination; and
- Increase the robustness of interim measures.

*** Working Groups include staff from NMED, KAFB, AFCEC, ABCWUA, CABQ, EPA**

Priorities

1) Protect Drinking Water Wells

2) Collapse the EDB Plume

3) Remove LNAPL

4) Soil Vapor Extraction in the Spill Area

Tasks will be conducted simultaneously.
