Subject: Nitrate Salt Waste Containers at WCS, WIPP Panel 7, and LANL Data Summary

Attached is a summary of the data contained in LANL's records related to the processing of nitrate salt drums. This information was taken from Processing Procedure Attachments and logbooks. The Attachments are filled out as the waste is processed as required by LANL Procedure EP-WCRR-WO-DOP-1198. Additionally, logbooks were consulted to obtain further information and/or context for the information taken from the Processing Data Sheets. We will also transmit the Excel file containing this data.

The data is subdivided by its current location, WCS, LANL, or WIPP Panel 7, Room 7. The location information was provided by LANL from the WCATS system and was not validated by EnergySolutions.
