**Environment Department Advises Residents Who Shop for Groceries along Border
with Other States to Check to Ensure Eggs Purchased are Safe**

Eggs Distributed in New Mexico are Not Part of National Recall

(Santa Fe, N.M.) The state Environment Department advises New Mexico residents who live along the state's border with Texas, Utah, Oklahoma, Arizona and Colorado and who shop in those other states to check eggs to ensure the product is not part of a national recall. New Mexico is not part of the recall involving eggs potentially having *Salmonella enteritidis*.

There is no evidence that New Mexico has any *Salmonella* cases connected to this recall, according to the New Mexico Department of Health.

"We have received calls from some New Mexico residents who have the affected eggs from other states and are advising those residents to return the product to stores," said Environmental Health Division Director Carlos Romero. "Eggs distributed in New Mexico are not part of the national recall at this time."

The following statement was released by officials of Wright County Egg regarding the U.S. Food and Drug Administration's investigation of potential incidence of *Salmonella enteritidis*:

Wright County Egg of Galt, Iowa is expanding its voluntary recall (original recall date: August 13, 2010) of specific Julian dates of shell eggs produced by their farms because they have the potential to be contaminated with *Salmonella*. *Salmonella* is an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with *Salmonella* often experience fever, diarrhea, nausea, vomiting and abdominal pain. In rare circumstances, infection with *Salmonella* can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections, endocarditis or arthritis.

Eggs affected by the expanded recall were distributed to food wholesalers, distribution centers and foodservice companies in California, Arizona, Missouri, Minnesota, Texas, Georgia, Washington, Oregon, Colorado, Nevada, Iowa, Illinois, Utah, Nebraska, Arkansas, Wisconsin and Oklahoma. These companies distribute nationwide.

Eggs are packaged under the following brand names: Albertsons, Farm Fresh, James Farms, Glenview, Mountain Dairy, Ralphs, Boomsma, Lund, Kemps and Pacific Coast. Eggs are packed in varying sizes of cartons (6-egg cartons, dozen egg cartons, 18-egg cartons, and loose eggs for institutional use and repackaging) with Julian dates ranging from 136 to 229 and plant numbers 1720 and 1942.

Dates and codes can be found stamped on the end of the egg carton or printed on the case label. The plant number begins with the letter P and then the number. The Julian date follows the plant number, for example: P-1720 223.

Prior Recall

Eggs under the August 13, 2010 recall are packaged under the following brand names: Lucerne, Albertson, Mountain Dairy, Ralph's, Boomsma's, Sunshine, Hillandale, Trafficanda, Farm Fresh, Shoreland, Lund, Dutch Farms and Kemps. Eggs are packed in varying sizes of cartons (6-egg cartons, dozen egg cartons, 18-egg cartons, and loose eggs for institutional use and repackaging) with Julian dates ranging from 136 to 225 and plant numbers 1026, 1413 and 1946.

There have been confirmed *Salmonella enteritidis* illnesses relating to the shell eggs and traceback investigations are ongoing.

Wright County Egg is fully cooperating with FDA's investigation by undertaking this voluntary recall. Our primary concern is keeping *Salmonella* out of the food supply and away from consumers. As a precautionary measure, Wright County Egg also has decided to divert its existing inventory of shell eggs from the recalled plants to a breaker, where they will be pasteurized to kill any *Salmonella* bacteria present.

Consumers who believe they may have purchased these shell eggs should not eat them but should return them to the store where they were purchased for a full refund. This recall is of shell eggs only. Other egg products produced by Wright County Eggs are not affected. Consumers with questions should visit www.eggsafety.org⁹ or call Wright County's toll-free information number (866-272-5582), which contains a message outlining recall instructions for consumers.

We are undertaking this additional recall to further protect the safety of consumers - this voluntary measure is consistent with our commitment to egg safety, and it is our responsibility.
