Environment Department Lifts the Precautionary Drinking Water Advisory for the SKP RV Park In Eddy County

(Santa Fe, N.M.) – The New Mexico Environment Department’s (NMED) Drinking Water Bureau is lifting the precautionary drinking water advisory for the SKP RV Park Water System in Eddy County.

NMED issued the precautionary advisory on September 26, 2014 which advised customers of the SKP RV Park water system to seek an alternate source of drinking water, such as bottled water until it could be determined if their wells were free from floodwater contamination.

NMED has inspected the water system and recent sampling results from the water system indicate that the water from the SKP RV Park is safe for human consumption.

Currently all of the precautionary advisories for public water systems in Eddy County have been lifted. The NMED Drinking Water Bureau will continue to monitor as well as provide technical assistance to the water systems in the affected area as needed.

For more information, call NMED Communications Director Jim Winchester at (505) 231-8800 or Brandi Garcia, Drinking Water Bureau Compliance Officer, at (575) 973-0731.
