

NEW MEXICO ENVIRONMENT DEPARTMENT
Pollution Prevention (P2) Pre-Assessment

This questionnaire is intended to determine the needs of New Mexico businesses wanting to evaluate pollution prevention strategies. It will assist the NMED P2 Program with identifying amounts and types of various waste produced, existing P2 measures, and the current needs of your businesses. All information is confidential and will be used for a non-regulatory review of your business operations in order for us to develop a site-specific P2 plan for your facility.

The NMED P2 Program will review the information provided here to determine the resources necessary for a comprehensive Pollution Prevention assessment. If you have any questions or need assistance, please contact the P2 Coordinator at (505) 222-9548 or jill.turner@state.nm.us.
