WHAT'S THE VALUE OF WATER?

When nature calls, you want open stalls.

Most of us never think about what happens to the water we flush. Luckily, we don't have to. Pumps, treatment plants, and pipes remove and clean wastewater so it can be returned to the environment or safely reused.

Clean water systems are one of the greatest public health achievements in history, but they're aging. They need investment to continue delivering life's most essential resource. All day, every day.

Water—Essential. Reliable. Invaluable.
