and
Preliminary Determination for an Air Quality Permit for
Targa Northern Delaware LLC

Targa Northern Delaware LLC at 201 S 4th Street, Artesia, NM has submitted an air quality permit application to the Air Quality Bureau (AQB), New Mexico Environment Department (NMED) for an air quality permit to construct/modify Plantview Compressor Station. The application file has been assigned Permit No. 6036M6 and TEMPO Agency Interest No. 34824. The exact location of the facility is at latitude and longitude decimal degrees: 32.244011, -103.549392 Datum: WGS84. To aid in locating this facility, the approximate location is 22.9 mi WNW of Jal in Lea County, NM.

The proposed modification is an NSR significant revision submitted under 20.2.72.219.D.(1)(a) NMAC. The changes consist of adding One (1) 499 hp air compressor generator (Unit GEN-3); One (1) 13.8 hp heater trailer (Unit Trailer-1); and One (1) enclosed combustion device (Unit ECD-1). In addition, Two (2) PSI 21.9L 650 hp generators (Gen-1 & Gen-2); and Two (2) 500 bbl condensate/oily wastewater storage tanks (Units T-3 & T-4), will be removed from the facility. The following units will be replaced: One (1) CAT 3516 LE+ 1340 hp compressor engine (Unit 274) with one (1) CAT 3516 1380 hp compressor engine (Unit C-1); One (1) CAT 3516 LE+ 1340 hp compressor engine (Unit 541) with one (1) CAT 3516 1380 hp compressor engine (Unit C-6); and One (1) Hero Flare 3372 Mscfd thermal oxidizer (Unit TO-1) with one (1) Hero Flare 12359 scfd flare (Unit FL-1). The facility is updating emissions based on gas analysis and renaming compressor units.

Total air pollutant emissions to the atmosphere are estimated to be approximately as follow: Parentheses note changes in emissions from previous construction permit – 6036M5. The emissions for the facility are expressed in tons per year (tpy). Nitrogen Oxides (NO_x) at 74.8 tons per year (tpy) (-6.3); Carbon Monoxide (CO) at 119.2 tpy (+114.3); Volatile Organic Compounds (VOC) at 68.9 tpy (+ 15.0); Sulfur Dioxide (SO₂) at 35.4 tpy (+ 30.5); Particulate Matter 10 microns or less (PM₁₀) at 6.3 tpy (-0.4); and Particulate Matter 2.5 microns or less (PM_{2.5}) at 6.3 tpy (-0.4); and greenhouse gas (CO₂e) > 75,000 tpy These emission estimates could change slightly during the course of the Department's review of the application.

The NMED has conducted a preliminary review of the information submitted with the permit application. The preliminary review and applicant's analysis of ambient air quality impacts indicates that the facility's air emissions will meet the air quality standards for NO_x, CO, SO_x, PM₁₀, PM_{2.5}. VOCs are a pre-cursor to ozone and the NMED does not require an individual ozone ambient impact analysis for each application. To determine compliance with national ambient air quality standards for ozone, NMED uses air monitors to monitor ozone concentrations. A full review will evaluate the estimated emission rates for the pollutants listed in this public notice and determine compliance with ambient air quality requirements and standards.

Based on the applicant's analysis, a preliminary determination is that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 1, 7, 50, 61, 70, 71, 72, 73, 75, 77, 82 and 40 CFR 60 Subparts A, OOOOb, and JJJ; 40 CFR 63 Subparts A, HH, and ZZZZ; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality permit on or before December 5, 2024.

To ensure compliance with state and federal air regulations, the permit is expected to include conditions that limit the emissions, hours of operation, production rate, and conditions that will require record keeping and reporting to the Department.

The permit application is available for review on the AQB Public Notices of Permitting Actions website www.env.nm.gov/public-notice.

All interested persons have thirty (30) days from the date this notice is published, to notify the Department in writing of their interest in the permit application. The written comments should refer to the company name, facility name and Permit No. (or send a copy of this notice along with your comments). The written comments shall state the nature of the issues raised and how it relates to the requirements of applicable state and federal air quality regulations and the Clean Air Act. The written comments should be mailed to Nicholas Thompson, New Mexico Environment Dept., Air Quality Bureau, Permit Section, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816, or submitted by email to Nicholas.Thompson@env.nm.gov Comments may also be submitted electronically via the NMED public comment portal online at: <https://nmed.commentinput.com/comment/search>.

The Department will notify all persons, who have provided written comments as to when and where the Department's analysis may be reviewed. Although all written comments will be made part of the public record, any person who does not express interest in writing before the end of this first thirty (30) day period will not receive such notification.

If the Department receives written public comment before the end of the Department's thirty (30) day public notice, the Department's analysis will be made available for review for thirty (30) days at the NMED district or field office nearest to the source before the permit will be issued. Written comments on the analysis or permit application may be submitted to the Department during this second thirty (30) day period or at any time before the permit is issued or denied.

Questions or comments not intended to be part of the public record can be directed to Adam Bland at 505-629-6604. General information about air quality and the permitting process can be found at the Air Quality Bureau's web site. The regulation dealing with public participation in the permit review process is 20.2.72.206 NMAC. This regulation can be found in the "Permits" section of this web site.

Atención

Este es un aviso de la oficina de Calidad del Aire del Departamento del Medio Ambiente de Nuevo México, acerca de las emisiones producidas por un establecimiento en esta área. Si usted desea información en español, por favor comuníquese con esa oficina al teléfono (505) 629-3395.
