

Ozone NAAQS Design Values

A design value is a statistic that describes the air quality status of a given location relative to the level of the National Ambient Air Quality Standards (NAAQS). Design values are typically used to designate and classify nonattainment areas, as well as to assess progress towards meeting the NAAQS.

This graph is updated quarterly and newly added data has not been certified by U.S. EPA. All data displayed should be considered preliminary and used with discretion. The New Mexico Environment Department is not responsible for the accuracy of the data or any interpretations or conclusions that may be drawn from the data.
