

Public Survey About Blowing Dust in New Mexico

This is a survey intended to gather opinions from New Mexico residents about if our state needs an air quality regulation for dust sources in New Mexico. Thank you for taking the time to complete this survey.

1. Today's date: _____

2. Your location: _____

3. Do you think dust is a problem where you live and work in New Mexico? If yes, why?

4. Although some industrial sources of dust are required to use dust control, no other regulation of sources of dust has taken place throughout most of New Mexico. Do you think our state needs a statewide regulation for previously unregulated dust sources? If yes, why? _____

5. If a new dust regulation is developed, are there specific sources to which the regulation should apply? Please list. _____

6. If a regulation is developed, are there specific sources to which the regulation should **not** apply? Please list. _____

7. If there is sufficient support for a new dust regulation, the Environment Department will bring together a group of stakeholders to participate in developing the new regulation. If you would like to participate in this group, please include your name, address, phone number, and e-mail address.

Name: _____

Address: _____

Phone number: _____

E-mail address: _____

8. Do you have any questions about blowing dust that we can help you answer?

9. Additional comments about dust? _____
