

SAMPLE  
NOTICE OF PERMIT APPLICATION

In order to comply with the requirement of the New Mexico Administrative Code Title 20, Chapter 2, Part 72 Construction Permits, \_\_\_\_\_ {*name of Installation owner*} hereby announces its intent to apply to the New Mexico Environment Department, Air Quality Bureau for registration to construct an Installation under general permit GCP-1 for Level One Oil and Gas Installations. The process for which the permit is sought is to \_\_\_\_\_ {*extract crude oil and/or natural gas from the earth, move crude oil and/or natural gas through pipelines, and/or inject crude oil, natural gas, and/or byproducts into the earth.*}. The Installation name is \_\_\_\_\_. The location of the Installation is Section \_\_\_\_\_, Township \_\_\_\_\_, Range \_\_\_\_\_, about \_\_\_\_\_ miles \_\_\_\_\_ to the \_\_\_\_\_ {*direction*} of \_\_\_\_\_. {*nearest city or village*}. The expected date for submittal of the registration application to the Bureau is \_\_\_\_\_.

General permit GCP-1 limits the annual emissions from any registered Installation to no more than:

1. 95 tons per year (TPY) of nitrogen oxides (NO<sub>x</sub>),
2. 95 TPY of carbon monoxide (CO),
3. 95 TPY of volatile organic compounds (VOCs),
4. 37 TPY of SO<sub>2</sub>
5. 8 TPY of any one hazardous air pollutant (HAP), and
6. 20 TPY of all HAPs combined.

Hourly emission limits are those listed in the application and must be low enough to ensure that the annual emissions limits will be met even if the facility operates full-time. The Department has modeled the allowable emissions from Installations that can meet all of the operating conditions described in the general permit, including the use of Low Emission Technology engines and turbines. Installations that can meet all of the permit restrictions have been determined to meet the New Mexico Ambient Air Quality Standards, the National Ambient Air Quality Standards, and the Prevention of Significant Deterioration increments. The maximum operating hours of the Installation are 24 hours per day, 7 days per week, and 365 days per year.

The owner and/or operator of the Installation is:

\_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

{*name*}  
 {*company*}  
 {*street address*}  
 {*city, state, zip code*}

Comments and questions regarding this application for registration under general permit GCP-1 or the permitting process may be directed to:

Program Manager, Permit Section  
 New Mexico Environment Department  
 Air Quality Bureau  
 1301 Siler Road, Building B  
 Santa Fe, NM 87507-3113

Please refer to the company name and Installation name used in this notice, or send a copy of this notice when making inquiries, because the Department may not have received the general permit registration application at the time of this notice.
