Re: Response to GCP-5 Registration Application for A. Montano - A. Montano Concrete

Dear Mr. Montano:

This letter is in response to your air quality permit application dated July 30, 2015 to construct a concrete batch facility in New Mexico. The Department received the application on July 31, 2015.

The application review has been completed and **the information provided is sufficient to issue your GCP-5 permit**. The Department authorizes this facility to be located latitude/longitude 35.6539°N, 106.0299°W (35°, 39', 13.9" N; 106°, 1', 47.7" W). The legal description is: New Mexico, New Mexico Meridian T17N, R9E, sec31. The UTM coordinates are zone 13 (X,Y) 406770, 3946046. This GCP5 will be located at 4519 Aqua Fria Street, Santa Fe, (Santa Fe County), NM, as specified in the application.

This letter serves as your permit registration to construct and operate under the attached copy of the GCP-5 general permit. The general permit includes the terms and conditions for operation as well as emission and compliance requirements.

In addition to 20.2.72 NMAC, the permittee is responsible for determining whether other state and federal regulations *such as* those found in Table 1 apply to any of the facility's units reported in the original GCP application or to any units that may be added to the facility in the future. It is the permittee's responsibility to determine applicability and to comply with all applicable regulations.

Table 1: Other Regulations

Citation	Title
20.2.61 NMAC	Smoke and Visible Emissions
40 CFR 60, Subpart I	Standards of Performance for Hot Mix Asphalt Facilities
40 CFR 60, Subpart OOO	Standards of Performance for Nonmetallic Mineral Processing Plants
40 CFR 60, Subpart IIII	Standards of Performance for Stationary Compression Ignition Internal Combustion Engines
40 CFR 60, Subpart JJJJ	Standards of Performance for Stationary Spark Ignition Internal Combustion Engines
40 CFR 63 Subpart ZZZZ	National Emissions Standards for Hazardous Air Pollutants (NESHAP) for Stationary Reciprocating Internal Combustion Engines

The following requirements will apply to any subsequent repositioning of emissions activities within the approved location.

- a. The facility will maintain at least a 3 mile setback between the area of operations and the boundary of any federal Class I area.
- b. Minimum distance between any emission source of the permitted Facility and the perimeter of the Restricted Area, except where the haul road crosses the Restricted Area perimeter shall be 13 meters (14 yards).

Pursuant to 20.2.75.11 NMAC, the Department will assess an annual fee for this facility. This regulation set the fee amount at \$1,500 through 2004 and requires it to be adjusted annually for the Consumer Price Index on January 1. The current fee amount is available by contacting the Department or can be found on the Department's website. The AQB will invoice the permittee for the annual fee amount at the beginning of each calendar year. This fee does not apply to sources which are assessed an annual fee in accordance with 20.2.71 NMAC. For sources that satisfy the definition of "small business" in subsection F of 20.2.75.7 NMAC, this annual fee will be divided by two.

A. Montano & Associates Sand & Gravel & Septic Tanks
A. Montano - A. Montano Concrete - GCP5-6538
