## Preliminary Determination for an Air Quality Permit for CCI San Juan LLC

CCI San Juan LLC, 811 Main Street Suite 3500, Houston., TX has submitted an air quality permit application to the Air Quality Bureau (AQB), New Mexico Environment Department (NMED) for an air quality permit to modify San Juan River Gas Plant. The application file has been assigned Permit No. 2013M5 and TEMPO Agency Interest ID No. 1252. The exact location of the facility is at latitude 36 degrees, 45 minutes, 31.49 seconds and longitude -108 degrees, 22 minutes, 2.11 seconds. To aid in locating this facility, the approximate location is 7 miles W of Farmington in San Juan County, NM.

The proposed modification will consist of 1) adding two natural gas compressor units (unit C-1300 and C-1400) to increase pressure from the field and increase plant throughput, 2) minor updates to correct emission calculations for the Flare (F-100), and 3) removal of emission point EVAP (Evaporative Pond), as the pond has been decommissioned.

Total air pollutant emissions to the atmosphere are estimated to be approximately Oxides (NO<sub>x</sub>) at 206.3 tons per year (tpy) (+12.2); Carbon Monoxide (CO) at 165.8 tpy (+26.5); Volatile Organic Compounds (VOC) at 100.9 tpy (+5.3); Sulfur Dioxide (SO<sub>2</sub>) at 229.1 tpy (No Change); Total Suspended Particulate Matter (TSP) at 11.4 tpy (+1.0), Particulate Matter 10 microns or less (PM<sub>10</sub>) at 11.4 tpy (+1.0), and Particulate Matter 2.5 microns or less (PM<sub>2.5</sub>) at 11.4 tpy (+1.0). The facility is a major source of greenhouse gas emissions, with sitewide  $\geq 100,000$  tpy CO<sub>2</sub>e (+11,200). These emission estimates could change slightly during the course of the Department's review of the application.

Based on the applicant's analysis, a preliminary determination is that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 1.116, 3, 7, 35, 37, 70, 71, 72, 73, 75, 77, 78, and 82; 40 CFR 50; 40 CFR 60 Subparts A, KKK, JJJJ, and OOOO; 40 CFR 63 Subparts A, HH, and ZZZZ; 40 CFR 64 (CAM), and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality permit on or before January 15, 2013. This source is a major source according to 20.2.74 NMAC, PSD.

To ensure compliance with state and federal air regulations, the permit is expected to include conditions that limit the emissions, hours of operation, production rate, and conditions that will require record keeping and reporting to the Department.

The permit application is available for review in electronic or hard copy at the Air Quality Bureau Office, 525 Camino de los Marquez Suite 1, Santa Fe, New Mexico. To arrange viewing of this application contact Teri Waldron, at 505-476-4355 or [teri.waldron@state.nm.us](mailto:teri.waldron@state.nm.us). The permit application is also available at the NMED Farmington Office, located at 3400 Messina,, Farmington, NM 87402 for public review.

All interested persons have thirty (30) days from the date this notice is published, to notify the Department in writing of their interest in the permit application. The written comments should refer to the company name, facility name and Permit No. (or send a copy of this notice along with your comments). The written comments shall state the nature of the issues raised and how it relates to the requirements of applicable state and federal air quality regulations and the Clean Air Act. The written comments should be mailed to Joseph Kimbrell, New Mexico Environment Dept., Air Quality Bureau, Permit Section, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816.

The Department will notify all persons, who have provided written comments as to when and where the Department's analysis may be reviewed. Although all written comments will be made part of the public record, any person who does not express interest in writing before the end of this first thirty (30) day period will not receive such notification.

If the Department receives written public comment before the end of the Department's thirty (30) day public notice, the Department's analysis will be made available for review for thirty (30) days at the NMED district or field office nearest to the source before the permit will be issued. Written comments on the analysis or permit application may be submitted to the Department during this second thirty (30) day period or at any time before the permit is issued or denied.

Questions or comments not intended to be part of the public record can be directed to Joseph Kimbrell at 505-476-4347. General information about air quality and the permitting process can be found at the Air Quality Bureau's web site. The regulation dealing with public participation in the permit review process is 20.2.72.206 NMAC. This regulation can be found in the "Permits" section of this web site.
