

Legal Notice and Preliminary Determination for an Air Quality Permit

CEMEX Construction Materials South LLC

CEMEX Construction Materials South LLC, 1 McKelligon Canyon Rd, El Paso, TX has submitted an air quality permit application to the Air Quality Bureau (AQB), New Mexico Environment Department (NMED) for an air quality permit to modify CEMEX - Vado Plant 400 TPH Rock Crusher. The application file has been assigned Permit No. 2112-M1 and TEMPO Agency Interest ID No. 2180. The exact location of the facility is at latitude 32 deg, 8 min, 16 sec and longitude -106 deg, 38 min, 13 sec. The facility is located at 14795 Las Alturas Drive in Mesquite, New Mexico in Dona Ana County.

The proposed modification will consist of the removal of Specific Condition 1.0 in permit 2112-R2 that states "This facility shall not remain at any one site more than one year from the date of initial startup at that site if the prevention of significant deterioration minor source baseline date for that air quality control region (AQCR) has been established for NO₂ or PM₁₀."

Total air pollutant emissions to the atmosphere are estimated to be approximately Total Suspended Particulate Matter (TSP) at 45.8 tpy, Particulate Matter 10 microns or less (PM₁₀) at 17.5 tpy, and Particulate Matter 2.5 microns or less (PM_{2.5}) at 2.5 tpy. The facility is a minor, < 100,000 tpy CO₂e, source of greenhouse gas emissions. These emission estimates could change slightly during the course of the Department's review of the application.

The NMED has conducted a preliminary review of the information submitted with the permit application. The preliminary review and applicant's analysis of ambient air quality impacts indicates that the facility's air emissions will meet the ambient air quality standards for TSP, PM₁₀, and PM_{2.5}. A full review will evaluate the estimated emission rates for the pollutants listed above and the air quality analysis to determine compliance with the associated ambient air standards and requirements.

Based on the applicant's analysis, a preliminary determination is that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 3, 72, 73, and 75; 40 CFR 50; 40 CFR 60 Subparts OOO and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality permit on or before June 24, 2013. This source is a minor source according to 20.2.74 NMAC, PSD.

To ensure compliance with state and federal air regulations, the permit is expected to include conditions that limit the emissions, hours of operation, and production rate, and conditions that will require record keeping and reporting to the Department.

The permit application is available for review in electronic or hard copy at the Air Quality Bureau Office, 1301 Siler Road, Building B, Santa Fe, New Mexico. To arrange viewing of this application contact Teri Waldron, at 505-476-4355 or teri.waldron@state.nm.us. The permit application is also available at the NMED Las Cruces Office, located at [1170](#) North Solano Drive Suite M, Las Cruces, NM **88001** for public review.

All interested persons have thirty (30) days from the date this notice is published, to notify the Department in writing of their interest in the permit application. The written comments should refer to the

company name, site name and Permit No. (or send a copy of this notice along with your comments). The written comments shall state the nature of the issues raised and how it relates to the requirements of applicable state and federal air quality regulations and the Clean Air Act. The written comments should be mailed to Antonia Tallarcio, New Mexico Environment Dept., Air Quality Bureau, Permit Section, 1301 Siler Road, Building B, Santa Fe, New Mexico 87507-3113.

The Department will notify all persons, who have provided written comments, as to when and where the Department's analysis may be reviewed. Although all written comments will be made part of the public record, any person who does not express interest in writing prior to the end of this first thirty (30) day period will not receive such notification.

If the Department receives written public comment prior to the end of the Department's thirty (30) day public notice, the Department's analysis will be made available for review for thirty (30) days at the NMED district or field office nearest to the source before the permit will be issued. Written comments on the analysis or permit application may be submitted to the Department during this second thirty (30) day period or at any time before the permit is issued or denied.

Questions or comments not intended to be part of the public record can be directed to Antonia Tallarcio at (505) 476-5564. General information about air quality and the permitting process can be found at the Air Quality Bureau's web site. The regulation dealing with public participation in the permit review process is 20.2.72.206 NMAC. This regulation can be found in the "Permits" section of this web site.
