

PUBLIC NOTICE
For
Air Quality Operating Permit
for Chaparral Gas Plant of Enterprise Field Services, LLC

Enterprise Field Services, LLC at PO Box 4324; Houston, TX 77210-4324 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Chaparral Gas Plant. The owner of this plant is Enterprise Products Operating, LLC. The exact location of the facility is at latitude 32 deg, 39 min, 15.06 sec and longitude -103 deg, 53 min, 41.54 sec. The facility is located approximately 12.4 miles south from Loco Hills, New Mexico in Eddy County. This application file has been assigned an Operating Permit Number P264 and TEMPO Agency Interest ID No. 26896.

Previously, the facility received an air quality construction permit and is in operation. The main purpose of the facility is to process natural gas for the removal of water, crude oil condensates, and carbon dioxide, and through fractionation extracts natural gas liquids (NGL) using cryogenic distillation. A parallel mechanical refrigeration process removes additional hydrocarbon liquids.

This operating permit application is for a new permit. Per 20.2.70.401.C.(4) NMAC, this permitting action involves the incorporation of applicable requirements from construction Permit No. 3662-M2 (issued April 10, 2012), including a more recent construction permit action, Permit No. 3662-M3 (issued September 4, 2014). This Title V operating permit action addresses additional requirements for Title V, such as a compliance assurance monitoring (CAM) plan for the glycol dehydration units.

There are no changes to the existing air emission limits in this permitting action. Emission limits remain the same as in construction Permit No. 3662-M3 issued September 4, 2014.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance.

The NMED has made a preliminary determination that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 1, 7, 35, 37, 70, 71, 72, 73, 77, and 82; 40 CFR 50; 40 CFR 60 Subparts A, KKK, JJJJ, OOOO; 40 CFR 63 Subparts A, HH, and ZZZZ; 40 CFR 64 Compliance Assurance Monitoring; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before December 13, 2014.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P264 by contacting Jim Nellessen at the New Mexico Environment Department, Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816. The Department contact in Santa Fe is Jim Nellessen at 505-476-4315.
