

LEGAL NOTICE
and
Preliminary Determination for an Air Quality Permit for
Enterprise Field Services, LLC

Enterprise Field Services, LLC, PO Box 4324, Houston, TX has submitted an air quality permit application to the Air Quality Bureau (AQB), New Mexico Environment Department (NMED) for an air quality permit to construct/modify Frances Mesa Compressor Station. The application file has been assigned Permit No. 1579M2 and TEMPO Agency Interest ID No. 1038. The exact location of the facility is/will be at latitude 36 deg, 46 min, 49.6611 sec and longitude -107 deg, 33 min, 45.8042 sec. To aid in locating this facility, the approximate location is 26 miles east of Blanco in Rio Arriba County, New Mexico.

The proposed modification will consist of updating SO₂ emission factors from use of natural gas with a total sulfur content of 0.2 grains of elemental sulfur per 100 standard cubic feet (gr S/100 scf) to 5 gr S/100 scf; addition of ten tons per year of malfunction emissions (Source ID MALF); increasing SSM events per hour emissions; increase the VOC emissions for several sources including glycol dehydrator, fugitives, instrument gas dryer, and SSM emissions; operating parameters for the glycol dehydrator identified as Unit 7 are being adjusted based on site records and process knowledge.

Total air pollutant emissions to the atmosphere are estimated to be approximately Nitrogen Oxides (NO_x) at 155.9 tons per year (tpy)(No Change); Carbon Monoxide (CO) at 248.2 tpy (No Change); Volatile Organic Compounds (VOC) at 92.5 tpy (increase of 26.3); Sulfur Dioxide (SO₂) at 5.2 tpy (increase of 5.2); Total Suspended Particulate Matter (TSP) at 3.4 tpy (increase of 3.4), Particulate Matter 10 microns or less (PM₁₀) at 3.4 tpy (increase of 3.4), and Particulate Matter 2.5 microns or less (PM_{2.5}) at 3.4 tpy (increase of 3.4). The facility is a minor, < 100,000 tpy CO₂e, source of green house gas emissions. These emission estimates could change slightly during the course of the Department's review of the application.

The NMED has conducted a preliminary review of the information submitted with the permit application. The preliminary review and applicant's analysis of ambient air quality impacts indicates that the facility's air emissions will meet the ambient air quality standards for SO₂ and PM_{2.5}. A full review will evaluate the estimated emission rates for the pollutants listed above and the air quality analysis to determine compliance with the associated ambient air standards and requirements.

Based on the applicant's analysis, a preliminary determination is that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 3, 61, 72, 73, 75; 40 CFR 50; 40 CFR 63 Subparts HH and ZZZZ; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality permit on or before October 03, 2012. This source is a minor source according to 20.2.74 NMAC, PSD.

To ensure compliance with state and federal air regulations, the permit is expected to include conditions that limit the emissions and conditions that will require record keeping and reporting to the Department.

The permit application is available for review in electronic or hard copy at the Air Quality Bureau Office, 1301 Siler Road, Building B, Santa Fe, New Mexico. To arrange viewing of this application contact Teri Waldron, at 505-476-4355 or teri.waldron@state.nm.us. The permit application is also available at the NMED Farmington Office, located at 3400 Messina Suite 5000, Farmington, NM 87402 for public review.

All interested persons have thirty (30) days from the date this notice is published, to notify the Department in writing of their interest in the permit application. The written comments should refer to the company name, site name and Permit No. (or send a copy of this notice along with your comments). The written comments shall state the nature of the issues raised and how it relates to the requirements of applicable state and federal air quality regulations and the Clean Air Act. The written comments should be mailed to Joseph Kimbrell, New Mexico Environment Dept., Air Quality Bureau, Permit Section, 1301 Siler Road, Building B, Santa Fe, New Mexico 87507-3113.

The Department will notify all persons, who have provided written comments, as to when and where the Department's analysis may be reviewed. Although all written comments will be made part of the public record, any person who does not express interest in writing prior to the end of this first thirty (30) day period will not receive such notification.

If the Department receives written public comment prior to the end of the Department's thirty (30) day public notice, the Department's analysis will be made available for review for thirty (30) days at the NMED district or field office nearest to the source before the permit will be issued. Written comments on the analysis or permit application may be submitted to the Department during this second thirty (30) day period or at any time before the permit is issued or denied.

Questions or comments not intended to be part of the public record can be directed to Joseph Kimbrell at 505-476-4347. General information about air quality and the permitting process can be found at the Air Quality Bureau's web site. The regulation dealing with public participation in the permit review process is 20.2.72.206 NMAC. This regulation can be found in the "Permits" section of this web site.
