

PUBLIC NOTICE
For
Air Quality Operating Permit
for Pump Canyon Compressor Station of Enterprise Field Services, LLC

Enterprise Field Services, LLC at PO Box 4324; Houston, TX 77210-4324 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Pump Canyon Compressor Station. The owner of this plant is Enterprise Field Services, LLC. The exact location of the facility is latitude 36 deg, 47 min, 41 sec; and longitude -107 deg, 44 min, 0 sec. This facility is located approximately 7 miles NE of Blanco in San Juan County, New Mexico. This application file has been assigned an Operating Permit Number P001R3M1 and TEMPO Agency Interest ID No. 1183.

Previously, the plant received an air quality construction permit and is in operation.

The main purpose of the plant is to compress field natural gas for transport through pipelines using compressor engines fueled by natural gas.

This operating permit application is for a Title V Significant Modification under NMAC 20.2.70.401.C. (4). Enterprise has concurrently filed a NSR permit revision and has included those proposed NSR permit changes in this application. The purpose of the NSR application is to authorize the addition of malfunction emissions, revised hourly SSM event counts, updated gas speciation, and the removal of Unit #7. The malfunction emissions are not associated with any specific equipment at the facility and therefore, this permit application addresses all sources at the facility.

The emissions, as established in NSR Permit 773-M5, and brought forward into this permit are as follows. Parentheses note changes in emissions from previous operating permit P001-R3 - emissions are expressed in tons per year (tpy). Nitrogen Oxides (NO_x) at 230.4 tpy (+38.4); Carbon Monoxide (CO) at 387.0 tpy (+64.5); Volatile Organic Compounds (VOC) at 76.4 tpy (+25.2); Sulfur Dioxide (SO₂) at 9.0 tpy (+8.4); and Particulate Matter 10 microns or less (PM₁₀) at 4.9 tpy (+0.80). This facility is a minor (< 100,000 tpy CO₂e) source of green-house gas emissions.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance status.

The NMED has made a preliminary determination that this plant will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 1, 7, 61, 70, 71, 72, 73, 74, and 82; 40 CFR 50; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before 9-29-2013.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P001-R3M1. Contact the New Mexico Environment Department, Air Quality Bureau, Operating Permit Unit, 525 Camino de los Marquez, Suite 1, Santa Fe, New Mexico 87505-1816.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau Operating Permits Unit, 1301 Siler, Bldg. B, Santa Fe, New Mexico 87507-3113. The Department contact in Santa Fe is Cille Pritchard-Hoback at 505-476-4340.
