

**PUBLIC NOTICE**  
For  
Air Quality Operating Permit  
for Val Verde Treatment Plant of Enterprise Field Services, LLC

Enterprise Field Services, LLC at PO Box 4324; Houston, TX 772104324 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Val Verde Treatment Plant. The owner of this plant is Enterprise Field Services, LLC. The exact location of the facility is at latitude 36 deg, 43 min, 39.1 sec and longitude -107 deg, 57 min, 20.3 sec. To aid in locating this facility, the approximate location is 1.5 miles northwest of Bloomfield in San Juan County, New Mexico. This application file has been assigned an Operating Permit Number P118-R2 and TEMPO Agency Interest ID No. 1182.

Previously, the plant received an air quality construction permit and is in operation. The main purpose of the plant is to remove carbon dioxide (CO<sub>2</sub>) and water from field natural gas. Natural gas is received by pipeline and then treated by one of the five treating trains. Each train consists of an amine unit for CO<sub>2</sub> removal and a glycol dehydrator to remove water. After treatment, the gas is removed from the facility by pipeline.

This operating permit application is for a permit renewal. Per 20.2.70.401.C.(4) NMAC, this permitting action involves incorporate changes authorized by NSR Permit 0728-M9 and renew the operating permit for five years.

The emissions, as established in NSR Permit 0728-M9, and brought forward into this permit are as follows. Parentheses note changes in emissions from previous operating permit action – P118-R1; emissions are expressed in tons per year (tpy). Nitrogen Oxides (NO<sub>x</sub>) at 225.7 tons per year (tpy) (No Change, NC); Carbon Monoxide (CO) at 175.0 tpy (NC); Volatile Organic Compounds (VOC) at 106.5 tpy (increase of 17); Sulfur Dioxide (SO<sub>2</sub>) at 46.7 tpy (NC); Total Suspended Particulate Matter (TSP) at 24.8 tpy (NC), Particulate Matter 10 microns or less (PM10) at 24.8 tpy (NC), and Particulate Matter 2.5 microns or less (PM2.5) at 24.8 tpy (NC). The facility is a major, >100,000 tpy CO<sub>2</sub>e/minor, source of green house gas emissions.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance status.

The NMED has made a preliminary determination that this plant will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 7, 61, 70, 71, 72, 73, and 77; 40 CFR 50; 40 CFR 60 Subparts A, Dc, LLL; 40 CFR 63 Subparts A, HH; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before December 01, 2013.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P118-R2. Contact the New Mexico Environment Department, Air Quality Bureau, Operating Permit Unit, 1301 Siler Rd, Bldg B, Santa Fe, New Mexico 87507-3113.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, Operating Permits Unit, 1301 Siler, Bldg B, Santa Fe, New Mexico 87507-3113. The Department contact in Santa Fe is Joseph Kimbrell at 505-476-4347.
