

PUBLIC NOTICE
For
Air Quality Operating Permit
for 3B-1 Turley Compressor Station of Enterprise Products Operating, LLC

Enterprise Products Operating, LLC at 1100 Louisiana Street, Houston, TX 77002-5227 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its 3B-1 Turley Compressor Station. The owner of this plant is Enterprise Field Services, LLC. The exact location of the facility is latitude 36 deg, 46 min, 4.3 sec and longitude -107 deg, 47 min, 25 sec. To aid in locating this facility, the facility is located approximately 2.0 miles northwest of Turley in San Juan County, NM. This application file has been assigned an Operating Permit Number P256 and TEMPO Agency Interest ID No. 1153.

Previously, the plant received an air quality construction permit and is in operation. This facility is a natural gas compressor station that boosts line pressure of the gas for subsequent movement down the pipeline. Field natural gas enters the facility through the inlet separator, where entrained liquids in the gas are separated. Liquids collected in the separator are sent to the condensate storage tank. After inlet separation, the gas stream is compressed in the compressor units and moved into the natural gas pipeline.

This operating permit application is for a new Title V operating permit. Per 20.2.70.401.C.(4) NMAC, this permitting action involves no changes to any previously permitted emissions limits. The facility is currently a minor, < 100,000 tpy CO₂e, source of green house gas emissions.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance status.

The NMED has made a preliminary determination that this plant will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 7, 61, 70, 71, 72, 73, and 82; 40 CFR 50; 40 CFR 63 Subpart ZZZZ; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before November 6, 2013.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P256. Contact the New Mexico Environment Department, Air Quality Bureau, Operating Permits Unit, 525 Camino de los Marquez, Suite 1, Santa Fe, New Mexico 87505-1816.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, Operating Permits Unit, 525 Camino de los Marquez, Suite 1, Santa Fe, New Mexico 87505-1816. The Department contact in Santa Fe is Daren Zigich at 505-476-4366.
