

**PUBLIC NOTICE**  
For  
Air Quality Operating Permit  
for Jal No.3 Gas Plant of Regency Field Services, LLC

Regency Field Services, LLC at 600 N. Marienfeld Street, Suite 700, Midland, TX 79701 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Jal No. 3 Gas Plant. The exact location of the facility is at latitude 32 deg, 10 min, 27.0104 sec and longitude -103 deg, 10 min, 33.0072 sec. To aid in locating this facility, the approximate location is 4 miles north northeast of Jal, New Mexico in Lea County. This application file has been assigned an Operating Permit Number P090-R2 and TEMPO Agency Interest ID No. 569.

Previously, the plant received an air quality construction permit, if one was required, and is in operation or able to operate. The main purpose of the plant is a natural gas treating and processing plant

This operating permit application is for a permit renewal. Per 20.2.70.401.C.(4) NMAC, this permitting action involves incorporation of changes in previously issued New Source Review permits, primarily consisting of: replacing a 21,827 hp turbine with four 3,550 hp compressor engines, removing a temporary boiler (79.8 MMBtu/h), permitting two new boilers (90 MMBtu/h and 120 MMBtu/h), and adding Startup, Shutdown, and Maintenance and Malfunction emissions.

The emissions, as established in NSR Permit 1092-M-8, and brought forward into this permit are as follows. Parentheses note changes in emissions from previous operating permit action – P090R1; emissions are expressed in tons per year (tpy). Nitrogen Oxides (NO<sub>x</sub>) at 655.5 tpy (-260.6); Carbon Monoxide (CO) at 1,057.6 tpy (+111.3); Volatile Organic Compounds (VOC) at 250.1 tpy (+83.2); Sulfur Dioxide (SO<sub>2</sub>) at 1,445.8 tpy (+217.7); Hydrogen Sulfide at 27.8 tpy (+15.1); Total Suspended Particulate Matter (TSP) at 38.4 tpy (+6.1); Particulate Matter 10 microns or less (PM<sub>10</sub>) at 38.4 tpy (+6.1); Particulate Matter 2.5 microns or less (PM<sub>2.5</sub>) at 38.4 tpy (+6.1). The facility is a major, >100,000 tpy CO<sub>2</sub>e/minor, source of green house gas emissions.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance status.

The NMED has made a preliminary determination that this plant will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 1, 7, 33, 35, 37, 61, 70, 71, 72, 73, 74, 77, and 82; 40 CFR 50; 40 CFR 60 Subparts A, Db, Dc, GG, KKK, LLL, JJJJ, and OOOO; 40 CFR 63 Subparts A, HH, ZZZZ, and DDDDD; 40 CFR 64; 40 CFR 68; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before March 14, 2014.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P090-R2. Contact the New Mexico Environment Department, Air Quality Bureau, Operating Permit Unit, 525 Camino de los Marquez, Suite 1, Santa Fe, New Mexico 87505.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, Operating Permits Unit, 525 Camino de los Marquez, Suite 1, Santa Fe, New Mexico 87505. The Department contact in Santa Fe is Melinda Owens at 505-476-4341.
