and

Preliminary Determination for an Air Quality Permit for

Tri-State Generation and Transmission

Tri-State Generation and Transmission, PO Box 33695, Denver, CO has submitted an air quality permit application to the Air Quality Bureau (AQB), New Mexico Environment Department (NMED) for an air quality permit to modify Prewitt Escalante Generating Station. The exact location of the facility is at latitude 35 deg, 24 min, 56.832 sec and longitude -108 deg, 4 min, 54.819 sec. To aid in locating this facility, the approximate location is 4 miles north of Prewitt, NM. The application file has been assigned Permit No. 0285-M4 and TEMPO Agency Interest ID No. 911.

The proposed modification will consist of adding an Alternative Monitoring Plan (AMP) for monitoring Opacity during Startup, Shutdown, and Maintenance events; increasing TSP, PM10, and PM2.5 emission rates due to burning coal from El Segundo Mine instead of the Lee Ranch Mine, and increasing the efficiency of the SO₂ scrubbers to account for increases in SO₂ in the El Segundo coal.

Total air pollutant emissions to the atmosphere are estimated to be approximately Nitrogen Oxides (NO_x) at 4919 tons per year (tpy)(no change); Carbon Monoxide (CO) at 771 tpy (NC); Volatile Organic Compounds (VOC) at 40 tpy (NC); Sulfur Dioxide (SO₂) at 2165 tpy (NC); Total Suspended Particulate Matter (TSP) at 340 tpy (+23), Particulate Matter 10 microns or less (PM10) at 257 tpy (+7.2), and Particulate Matter 2.5 microns or less (PM2.5) at 227 tpy (+1.6), and green house gas (CO₂e) at 2,363,891 tpy (+24,721). The facility is a major, ≥100,000 tpy CO₂e, source of green house gas emissions. These emission estimates could change slightly during the course of the Department's review of the application.

The NMED has conducted a preliminary review of the information submitted with the permit application. The preliminary review and applicant's analysis of ambient air quality impacts indicates that the facility's air emissions will meet the air quality standards for TSP, PM10, and PM2.5.

Based on the applicant's analysis, a preliminary determination is that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 70 and 71; 40 CFR 50; 40 CFR 72; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality permit on or before November 07, 2013.

To ensure compliance with state and federal air regulations, the permit is expected to include conditions that limit the emissions, hours of operation, production rate, and conditions that will require record keeping and reporting to the Department.

The permit application is available for review in electronic or hard copy at the Air Quality Bureau Office, 525 Camino de los Marquez Suite 1, Santa Fe, New Mexico. To arrange viewing of this application contact Teri Waldron, at 505-476-4355 or teri.waldron@state.nm.us. The permit application is also available at the NMED Grants Office, located at 900 Mount Taylor Road, Grants, NM 87020 for public review.

All interested persons have thirty (30) days from the date this notice is published, to notify the Department in writing of their interest in the permit application. The written comments should refer to the company name, facility name and Permit No. (or send a copy of this notice along with your comments). The written comments shall state the nature of the issues raised and how it relates to the requirements of applicable state and federal air quality regulations and the Clean Air Act. The written comments should

be mailed to Joseph Kimbrell, New Mexico Environment Dept., Air Quality Bureau, Permit Section, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816.

The Department will notify all persons, who have provided written comments as to when and where the Department's analysis may be reviewed. Although all written comments will be made part of the public record, any person who does not express interest in writing before the end of this first thirty (30) day period will not receive such notification.

If the Department receives written public comment before the end of the Department's thirty (30) day public notice, the Department's analysis will be made available for review for thirty (30) days at the NMED district or field office nearest to the source before the permit will be issued. Written comments on the analysis or permit application may be submitted to the Department during this second thirty (30) day period or at any time before the permit is issued or denied.

Questions or comments not intended to be part of the public record can be directed to Joseph Kimbrell at 505-476-4347. General information about air quality and the permitting process can be found at the Air Quality Bureau's web site. The regulation dealing with public participation in the permit review process is 20.2.72.206 NMAC. This regulation can be found in the "Permits" section of this web site.
