

PUBLIC NOTICE
For
Air Quality Operating Permit
for Targa - Eunice Gas Processing Plant of Versado Gas Processors, LLC

Versado Gas Processors, LLC at 6 Desta Drive Suite 3300; Midland, TX 79705 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Targa - Eunice Gas Processing Plant. The owner of this plant is Versado Gas Processors, LLC. The exact location of the facility is at latitude 32 deg, 25 min, 29.8 sec and longitude -103 deg, 8 min, 50.1 sec. To aid in locating this facility, the approximate location is 1 mile SE of Eunice in Lea County, New Mexico. This application file has been assigned an Operating Permit Number P109R2 and TEMPO Agency Interest ID No. 609.

Previously, the facility received an air quality construction permit and is in operation. The main purpose of the facility is to receive field natural gas, perform dehydration and removal of carbon dioxide and hydrogen sulfide, and separate natural gas liquids (NGL). The product natural gas and NGL are compressed or pumped to sales pipelines for distribution.

This operating permit application is for a permit renewal. Per 20.2.70.401.C.(4) NMAC, this permitting action involves this Title V Renewal Application with changes from the NSR Modification application 0067M6R1 and R2. Targa added a new Soil Vapor Extraction (SVE) Unit. The SVE is rich burn, natural-gas fired internal combustion engine that has been modified to draw soil vapors into the intake manifold and burn them along with supplemental natural gas. The SVE is controlled with a three-way catalyst, and is expected to operate for less than 60 days on site. Unit is permitted at 8760 h/yr.

The emissions, as established in NSR Permit 0067M6R1 and 67M6R2, and brought forward into this permit are as follows. Parentheses note changes in emissions from previous operating permit – P218-R1. Emissions are expressed in tons per year (tpy). Nitrogen Oxides (NO_x) at 3780 tpy (-82.6); Carbon Monoxide (CO) at 847.2 tpy (+6.1); Volatile Organic Compounds (VOC) at 206 tpy (+22.6); Sulfur Dioxide (SO₂) at 2877.7 tpy (+1650.7); Particulate Matter 10 microns or less (PM₁₀) at 25 tpy (+25) , and Particulate Matter 2.5 microns or less (PM_{2.5}) at 25 tpy (+25). The facility is a major, >100,000 tpy CO₂e source of green house gas emissions.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance.

The NMED has made a preliminary determination that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 7, 35, 37, 70, 71, 72, 73, 74, 75, 77, and 82; 40 CFR 50; 40 CFR 60 Subparts A, KKK, and JJJJ; 40 CFR 63 Subparts a, HH, and ZZZZ; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before April 6, 2014.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P109R2 by contacting Joseph Kimbrell at the New Mexico Environment Department, Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816. The Department contact in Santa Fe is Joseph Kimbrell at 505-476-4347.
