

PUBLIC NOTICE
For
Air Quality Operating Permit
for Eunice North Compressor Station of Versado Gas Processors, LLC

Versado Gas Processors, LLC at 6 Desta Drive Suite 3300; Midland, TX 79705 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Eunice North Compressor Station. The owner of this plant is Versado Gas Processors, LLC and the operator is Targa Midstream Services, LLC. The exact location of the facility is at latitude 32 deg, 27 min, 42.03 sec and longitude -103 deg, 9 min, 47.56 sec. To aid in locating this facility, the approximate location is approximate 1 mile north of Avenue O and State Highway 207 in Lea County, New Mexico. This application file has been assigned an Operating Permit Number P082-R2 and TEMPO Agency Interest ID No. 602.

Previously, the facility received an air quality construction permit and is in operation.

The main purpose of the facility is to gather natural gas from the field and compress the gas through pipelines for sale. Power for compression is generated through natural gas fired compressor engines.

This operating permit application is for a permit renewal. Per 20.2.70.401.C(4) NMAC, this permitting action involves incorporating applicable requirements from construction permits 57-M4 and 57-M5. Changes in those permits include replacing a Cooper-Bessemer engine with a Waukesha engine, re-installing a backup generator, and permitting existing emissions from routine and predictable startup, shutdown, and maintenance.

The emissions, as established in NSR Permits 57-M4 and 57-M5, and brought forward into this permit are as follows. Parentheses note changes in emissions from the previous operating permit P082-R1M11. Emissions are expressed in tons per year (tpy). Nitrogen Oxides (NOx) at 1211.9 tpy (no change); Carbon Monoxide (CO) at 344.5 tpy (no change); Volatile Organic Compounds (VOC) at 108.6 tpy (no change); Sulfur Dioxide (SO₂) at 42.2 tpy (+1.4); and Particulate Matter 10 microns or less (PM₁₀) at 19.6 tpy (+19.6). The facility is a minor, < 100,000 tpy CO₂e, source of green house gas emissions.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance status.

The NMED has made a preliminary determination that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 7, 61, 70, 71, 72, 73, 74, 77, and 82; 40 CFR 50; 40 CFR 60 Subparts A and JJJJ; 40 CFR 63 Subparts A and ZZZZ; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before January 15, 2013.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P082-R2. Contact the New Mexico Environment Department, Air Quality Bureau, Operating Permit Unit, 1301 Siler Rd, Bldg B, Santa Fe, New Mexico 87507-3113.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, Operating Permits Unit, 1301 Siler, Bldg B, Santa Fe, New Mexico 87507-3113. The Department contact in Santa Fe is Cember Hardison at 505-476-4346.
