

PUBLIC NOTICE
For
Air Quality Operating Permit
for El Cedro Gas Treating Plant of Williams Four Corners LLC

Williams Four Corners LLC at 188 County Road 4900; Bloomfield, NM 87413 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its El Cedro Gas Treating Plant. The exact location of the facility is/will be at latitude 36 deg, 41 min, 20.5 sec and longitude -107 deg, 24 min, 6.2 sec. This facility is located approximately 24 miles east of Blanco, New Mexico in Rio Arriba County. This application file has been assigned an Operating Permit Number P046-R2M1 and TEMPO Agency Interest ID No. 1002.

Previously, the facility received an air quality construction permit and is in operation.

The main purpose of the facility is to compress coal-seam and conventional natural gas using engines and turbines and stabilize natural gas condensate with process heaters.

This operating permit application is for a permit modification. Per 20.2.70.401.C.(4) NMAC, this permitting action involves revising serial numbers and manufacture dates for Unit 7, updating Units 15 and 16 operating parameters, correcting NO_x, CO and particulate mass emission limits for Units 17 and 18, correcting a permitting error by adding back in Unit 37 and removing Unit 46, increasing truck loading emissions, updating SSM and produced water tank emissions, revising condensate throughput monitoring, revising the unstabilized condensate transfer throughput and removing Units 22a&b, 26a&b, 27a&b (dehydrators and reboilers); 25, 32 and 33 (4SRB RICE); 29 and 30 (flares) and 31 and T31 (amine contactor and associated tank) from the permit. The modification also consists of a corrective action plan and a CAM plan for Units 17 and 18 as required by Title V permit P046-R2 Section A113.

The emissions, as established in NSR Permit PSD340-M11, and brought forward into this permit are as follows. Parentheses note changes in emissions from previous operating permit – P046-R2. Emissions are expressed in tons per year (tpy). Nitrogen Oxides (NO_x) at 311 tpy (-25); Carbon Monoxide (CO) at 434 tpy (-33.4); Volatile Organic Compounds (VOC) at 313 tpy (-19.2); Sulfur Dioxide (SO₂) at 3 tpy (no change); Particulate Matter 10 microns or less (PM₁₀) at 11 tpy (-0.5), and Particulate Matter 2.5 microns or less (PM_{2.5}) at 11 tpy (-0.5); and greenhouse gas (CO₂e) > 75,000 tpy.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance.

The NMED has made a preliminary determination that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 7, 61, 70, 71, 72, 73, 74, 77 and 82; 40 CFR 50; 40 CFR 60 Subparts A and GG; 40 CFR 63 Subparts A and ZZZZ; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before October 6, 2015.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P046-R2M1 by contacting Daren Zigich at the New Mexico Environment Department, Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816. The Department contact in Santa Fe is Daren Zigich at 505-476-4366. Este es un aviso de la Agencia de Calidad de Aire del Departamento de Medio Ambiente de Nuevo México, acerca de las emisiones producidas por un establecimiento en esta área.
