

New Mexico Clean Transportation Fuel Program: ZIP Codes for Enhanced Fuel Supply Equipment Credits Based on Household Income Criteria*

Source: US Census Bureau, American Community Survey (2017-2024)

Data for each ZIP code using most recent year with available data, both for median household income and that year's mean state household income.

*Pursuant to 20.2.92.304(E) NMAC, fuel supply equipment in ZIP codes with a median household income that is equal to or less than the state average for the latest available year with data may qualify for fuel supply equipment credits with an enhanced maximum lifetime monetary credit limit that is 2.0 times rather than 1.5 times greater than total capital expenditure on the fuel supply equipment minus any grant revenue or other funding. ZIP codes that do not qualify based on this criteria may still qualify based on having per-capita fuel availability for the fuel supply equipment's fuel type that is less than seventy-five percent of the New Mexico average, pursuant to 20.2.92.304(E)(2)(b) NMAC.
