Environment Department confirms boil water advisory required for Lovington Municipal Water Supply in Lea County*13,231 users urged to boil water prior to drinking*

LOVINGTON — The New Mexico Environment Department's Drinking Water Bureau confirms that a boil water advisory is required for the Lovington Municipal Water Supply in Lea County.

The Lovington Municipal Water Supply was required to issue the advisory on Jan. 24, 2021 after bacteriological contamination (*E. coli*) was confirmed in drinking water samples from the water system's distribution system. New Mexico drinking water regulations require Lovington Municipal Water Supply to notify their water system consumers of this finding as soon as practical but no later than 24 hours after the system is notified of the confirmation of the violation.

The Lovington Municipal Water Supply is a community public water system that serves approximately 13,231 users. This advisory applies only to the drinking water from the Lovington Municipal Water Supply and does not extend to any other surrounding water systems.

Lovington Municipal Water Supply users are advised to boil water for three minutes before:

- Drinking
- Making coffee, tea and other drinks
- Making ice
- Cooking
- Washing fruits and vegetables
- Using the water to feed a baby
- Brushing teeth
- Providing as drinking water for pets

The presence of *E. coli* in water indicates that the water may have been in contact with sewage or animal wastes and could contain disease-causing organisms. Most strains of *E. coli* are harmless and live in the intestines of healthy humans and animals. However, a positive test for *E. coli* in the drinking water supply may indicate the presence of dangerous strains of *E. coli* or other disease-causing organisms. These types of organisms may cause severe gastrointestinal illness and, in rare cases, death. Children, the elderly and immuno-compromised individuals are at an increased risk of illness.

The Drinking Water Bureau will provide compliance oversight and offer technical assistance to the water system and require the Lovington Municipal Water Supply to continue to test the water until no further threat of contamination remains.

More information about boil water advisories in English and Spanish is available [here](#). For more information on today's announcement please call NMED Drinking Water Bureau Southern Compliance Supervisor Brandi Littleton at 575-323-4298.
