For Immediate Release

Animas Valley Water Company – Morningstar Weekly Progress Report

The following information is intended to keep customers updated on progress toward a direct connection to the City of Farmington's Drinking Water System.

1. ***Boil Water Advisory still in effect***

2. ***Water Conservation Measures.*** *There is no need to conserve water anymore. AV Water thanks you for doing this during the construction and flushing phases. The tanks are full and flushing will end today.*

3. ***Farmington Interconnect.*** *System is totally connected to Farmington since Friday July 22.*

4. ***Pump Station.*** *The permanent pump station is fully operational.*

5. ***Flushing of lines.*** *Flushing has been finished in all subdivisions. County Road 3000 will be finished flushing today. When flushing is finished a handout is being given to all customers pertaining to flushing your residence.*

6. ***Samples and Testing.*** *Samples are being collected and tested throughout the system.*

7. ***Deficiency Report*** *was concluded July 1 and is being reviewed by Souder Miller Engineers. A comprehensive water distribution map is being prepared in conjunction with Souder Miller and previous work done by Molzen Corbin Engineers.*
