*Allocated subsidy for SFY16 was fully expended in Quarter 1. (Note: Unutilized subsidy may become available.)				
**0% interest rate applies to the first \$600,000 of the loan.				
***All projects may be utilized to fulfill federal equivalency requirements and FFAATA requirements for the FY15 Capitalization Grant				

DWSRLF Fundable Priority List (SFY16 Quarter 3)***

County	Disadvantaged?	Project Description
Sandoval	No	Re-drill and equip well 13, provide for additional arsenic treatment, and add water storage capacity.
Taos	Severely	The Town of Taos seeks to develop a 500kW solar PV system to provide alternate power supply to critical drinking water infrastructure located in the Los Cordovas area south of Town. Specifically, a net-metered solar PV system built on Town of Taos property to supply electrical power to the Town's municipal supply wells (7,8, and 9) and arsenic treatment plant.
Quay	Severely	The project will replace a failed water tank that was part of the drinking water system. The tank has been out of service for two years and needs to be replaced. The project will allow the City to blend water from the in-town and out-of-town well fields.
Sandoval	No	Mainline replacement, refurbishment of 8 tanks, and replacement of manual-read meters with radio-read meters
Sandoval	No	Booster station at Tank 8 and transmission line from Tank 8 to Tank 13
Santa Fe	No	24-inch dual transmission line, 1 MG storage tank, and PV array
