

# Free Extreme Events & Climate Adaptation Planning Workshop for the Water Utility Sector June 3-4, 2015 Pueblo of Santa Ana, New Mexico

The U.S. Environmental Protection Agency's Climate Ready Water Utilities (CRWU) initiative is pleased to be offering an interactive training workshop for drinking water, wastewater, and stormwater utilities. The workshop will explore strategies for enhancing utility resilience to extreme weather events, as well as planning to address long-term climate change impacts to the water sector. The agenda will feature opportunities for peer-to-peer learning and engagement as well as hands-on training with the EPA's Climate Resilience Evaluation and Awareness Tool (CREAT). [Registration Now Open!](#)

## Who should attend?

- Drinking water, wastewater and stormwater utility operators
- Local, state, federal and tribal government officials
- Watershed planners
- Water sector associations

Day 1	Day 2
Utility Perspectives on Extreme Events	CREAT Training: Interactive Session
Regional Climate Variability & Water Sector Impacts	Identifying Adaptation Strategies
Overview of CRWU	Advancing Implementation of Adaptation Measures
CREAT Training: Interactive Session	Funding Sources & Strategies
