

Asset Management: What's in it for me?

Gallup, NM

April 28, 2014 | 9:00am–12:30pm

The Environmental Finance Center Network (EFCN)

is a university-based organization creating innovative solutions to the difficult how-to-pay issues of environmental protection and improvement. The EFCN works with the public and private sectors to promote sustainable environmental solutions while bolstering efforts to manage costs. *Under a Cooperative Agreement with the US EPA.*

Cost: Free, but please register to reserve a spot

Contact: Susan Butler, (505) 514-6768, butlernmefc@gmail.com

Training Details: Have you ever asked yourself the question, “Am I spending my revenue dollars in the best way possible?” or “I can’t do everything I would like to do with my system, so how do I decide what is best for me to do?” or “I would like to make sure I am able to provide the best customer service I can within the resources I have available, how do I do that?” The process of Asset Management is one way to address these very questions. In the current climate of increasing regulations, decreasing revenues, and decreasing water resources, an approach such as asset management is absolutely vital.

You are invited to this half-day workshop to hear more information regarding what asset management is and how it can be used to help you answer these and many other questions. We will provide you with access to tools to help you begin the process and understand the benefits. This workshop is being sponsored by The Environmental Finance Center Network (EFCN) as part of our project, titled, “Smart Management for Small Water Systems,” funded by EPA. We hope to see you there.

Register using the form below, or online at efcnetwork.org/upcoming.
