Ground Water Discharge Permit and Application Status of Dairy Facilities in New Mexico

Discharge Permit Classifications

The New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) has issued discharge permits for approximately 268 dairy facilities since it began regulation of these facilities in the late 1970's.

Facilities are classified by the GWQB as follows:

- **Active** – facility that is actively discharging and has a discharge permit (effective or expired)
- **Inactive** – facility that is not actively discharging, likely has the infrastructure necessary to resume operation with the intent to resume discharging, and has a discharge permit (effective or expired)
- **Paper Dairy** – facility that has not yet discharged (likely not yet constructed) and has a discharge permit (effective or expired).
- **Pending** – new facility for which an application for a new discharge permit has been received by the department. [NMED has received four new applications for new discharge permits (new facilities) for which action on behalf of the department is pending until adoption of the new dairy rule.]
- **Ceased** – facility which has a permit (effective or expired), is not discharging and likely has no intent to resume discharging, may not have the infrastructure necessary to resume operation, and has not submitted an application for renewal.
- **Terminated** – facility whose discharge permit number has been retired by the department.
- **Withdrawn** – facility whose discharge permit was not issued because the application was withdrawn by the applicant; the facility never had a discharge.
- **Denied** – Application was received for a discharge permit and was denied; no discharge permit issued. [Recently, NMED's Secretary denied an application for a new discharge permit following two public hearings.]

The current status of the 268 permitted facilities, 4 new applications and 1 permit denial (i.e., 273 dairy facilities; reference Table 1), is as follows:

- 144 – Active
- 24 – Inactive
- 37 – Paper Dairies
- 4 – Pending
- 28 – Ceased
- 31 – Terminated
- 4 – Withdrawn
- 1 – Denied

Ground Water Discharge Permit and Application Status of Dairy Facilities in New Mexico

Permitting Status

Of the of 273 dairy facilities mentioned above;

- 36 facilities are not applicable to the lists below because they have the following status.
  - Terminated – 31
  - Withdrawn – 4
  - Denied - 1
- 4 have pending applications for new discharge permits.
- 28 facilities are classified as "ceased" for which, according to the proposed dairy rule, each will need to submit a renewal application for closure.

There are 205 dairy facilities classified as Active (144), Inactive (24) and Paper Dairy (37) (reference Table 2).

- As of March 6, 2010, 115 of these 205 facilities have expired discharge permits.
  - 2 expired in 2003
  - 3 expired in 2004
  - 7 expired in 2005
  - 27 expired in 2006
  - 17 expired in 2007
  - 29 expired in 2008
  - 28 expired in 2009
  - 2 have expired in 2010 as of March 6, 2010

- As of March 6, 2010, 90 of these 205 facilities have current and effective discharge permits.
  - By June 30, 2010, an additional 8 will expire
  - Between July 1 and December 31, 2010, 13 more will expire
  - Between January 1 and June 30, 2011, 19 more will expire
  - Between July 1 and December 31, 2011, 15 more will expire, thus a total of 34 will expire in 2011.

- As of March 6, 2010, 53.5 % (77 facilities) of the 144 Active dairy facilities are currently discharging without an effective discharge permit; shown in Figure 1 below.

Ground Water Discharge Permit and Application Status of Dairy Facilities in New Mexico

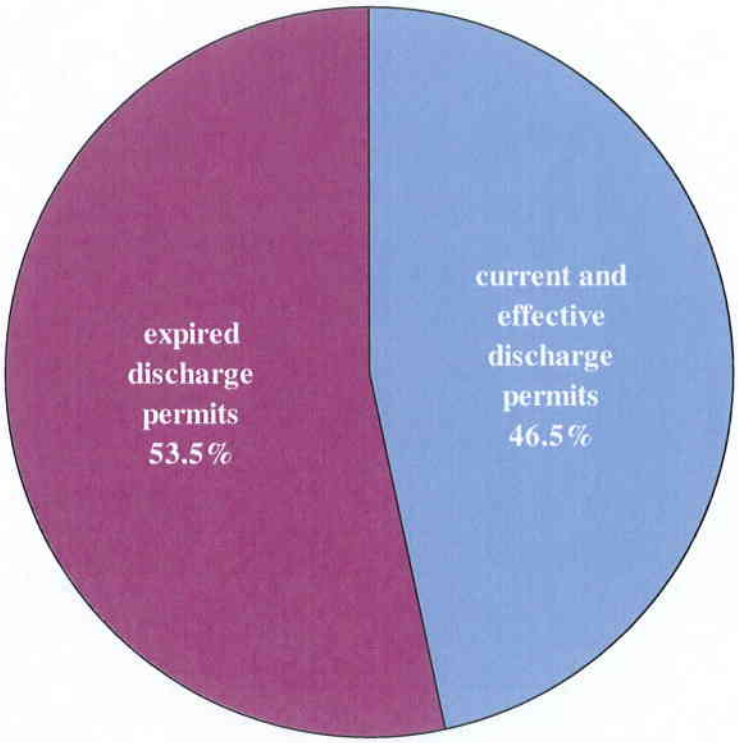

Figure 1: Discharge permit status of active dairy facilities as of March 6, 2010.

Application Status

There are 205 dairy facilities classified as Active (144), Inactive (24) and Paper Dairy (37) that have the following discharge permit application status:

- 74 applications were received from facilities prior to the expiration date of their discharge permit.
- 31 applications were received from facilities after the expiration date of their discharge permit.
- 21 facilities currently have expired discharge permits for which the department has not yet received an application for renewal.
- 79 facilities have current and effective discharge permits for which an application is not yet required in accordance with 20.6.2.3107 NMAC and for which an application has not been received by the department.

Table 1: Current Status of all Dairies Facilities Permitted by the NMED-GWQB

Discharge Permit No. (DP#)	Current Facility Name	Year Discharge Began	Status	County	Closest City	Permitted Discharge Volume - Gallons per Day (GPD)	Most shallow Depth-to-Water (ft) as of March 2009	Permitted wastewater management practices
