

Notice is hereby given pursuant to 20.6.2.3108 NMAC, the following proposed Ground Water Discharge Permit applications have been submitted to the New Mexico Environment Department (NMED) for review.

DP #	Facility/Applicant	Closest City	County	Notice	NMED Permit Contact
1814	Winrock Town Center New Regal Entertainment Group Theater Gary Goodman Winrock Partners Authorized Signatory Winrock Town Center New Regal Entertainment Group Theater 100 Sun Ave., NE Suite 210 Albuquerque, NM 87109	Albuquerque	Bernalillo	Winrock Town Center New Regal Entertainment Group Theater, Gary Goodman, Winrock Partners, Authorized Signatory, proposes to discharge up to 2,400 gallons per day of grey water to an irrigation system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at 2100 Louisiana Blvd NE, Albuquerque, in Section 18, T10N, R04E, Bernalillo County. Ground water beneath the site is at a depth of approximately 392 feet and has a total dissolved solids concentration of approximately 500 milligrams per liter.	Melissa Halick melissa.halick@state.nm.us
58	San Rafael Water and Sanitation District Salvador Marez, Chairman San Rafael Water and Sanitation District PO Box 99 San Rafael, NM 87051	San Rafael	Cibola	San Rafael Water and Sanitation District, Salvador Marez, Chairman, proposes to renew the Discharge Permit for the discharge of up to 40,425 gallons per day of domestic wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at 419-A Ice Cave Road, San Rafael, in Section 14, T10N, R10W, Cibola County. Ground water beneath the site is at a depth of approximately 19 feet and has a total dissolved solids concentration of approximately 30,000 milligrams per liter.	Steve Pedro steven.pedro@state.nm.us
873	Cannon Air Force Base Col. Albert M. Elton II, Commander 100 S Air Commando Way, Suite 100 Cannon AFB, NM 88103-5214	Clovis	Curry	Cannon Air Force Base, Col. Albert M. Elton II, Commander, proposes to renew and modify the Discharge Permit for the discharge of up to 1,507,500 gallons per day of domestic wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at 100 S. Air Commando Way, Suite 100, Cannon AFB, in Sections 17, 18, 19, 20, and 30, T2N, R35E, and in Sections 12, 13, 24, and 25, T2N, R34E, Curry County. Ground water beneath the site is	Naomi Davidson naomi.davidson@state.nm.us

				at a depth of approximately 284 feet and has a total dissolved solids concentration of approximately 300 milligrams per liter.	
1651	Banner Mill Site W. Pierce Carson, CEO Banner Mill Site 6100 Uptown Blvd. NE, Suite 600 Albuquerque, NM 87110	Lordsburg	Hidalgo	Banner Mill Site, W. Pierce Carson, CEO, proposes to renew and modify the Discharge Permit for the discharge of up to 246,000 gallons per day of mill tailings to a lined tailings impoundment. Potential contaminants from this type of discharge include metals, total dissolved solids, sulfates, and pH outside of the acceptable range. The facility is located on State Road 494, approximately 4.5 miles southwest of Lordsburg, in Sections 14 and 23, T23S, R19W, Hidalgo County. Ground water beneath the site is at a depth of approximately 717 feet and has a total dissolved solids concentration of approximately 1,800 milligrams per liter.	Lawrence Shore lawrence.shore@state.nm.us
1302	Outlook Dairy Isaak Bos, Manager Outlook Dairy 303 State Hwy 83 Lovington, NM 88260	Lovington	Lea	Outlook Dairy, Isaak Bos, Manager, proposes to renew and modify the Discharge Permit for the discharge of up to 65,000 gallons per day of agricultural wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at 626 E Crockett Rd, approximately eight miles northeast of Lovington, in Sections 4, 5, 8, and 9, T15S, R37E, Lea County. Ground water beneath the site is at a depth of approximately 92 feet and has a total dissolved solids concentration of approximately 500 milligrams per liter.	Kimberly Kirby kimberly.kirby@state.nm.us
1817	Waste Control Specialists Elicia Sanchez, Vice President Waste Control Specialists, LLC PO Box 1129 Andrews, TX 79714	Eunice	Lea	Waste Control Specialists, Elicia Sanchez, Senior Vice President, proposes to discharge up to 170,500,000 gallons of contact and noncontact storm water per 100-year storm event from a hazardous waste management facility to a treatment and disposal system. Potential contaminants from this type of discharge include organic compounds, metals, and radionuclides. The facility is located at 9998 TX State Hwy 176, approximately 29 miles northwest of Andrews and approximately 6 miles east of Eunice, Andrews County, Texas. Ground water beneath the site is at a depth of approximately 19-35 feet and has a total dissolved solids concentration of 5,000 milligrams per liter or less.	John Hall john.hall@state.nm.us

1418	Stetson Dairy Gary Barnett, Manager Stetson Dairy PO Box 307 Hatch, NM 87937	Hatch	Luna	Stetson Dairy, Gary Barnett, Manager, proposes to renew and modify the Discharge Permit for the discharge of up to 120,000 gallons per day of agricultural wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at 22222 Stetson Rd, approximately 16.5 miles southwest of Hatch, in Sections 29, 31, and 32, T20S, R05W, Luna County. Ground water beneath the site is at a depth of approximately 14 feet and has a total dissolved solids concentration of approximately 1,130 milligrams per liter.	Kimberly Kirby kimberly.kirby@state.nm.us
1815	Tim's Trailer Park Timothy Salazar, Owner Tim's Trailer Park 11108 Colville Rd., SE Albuquerque, NM 87123	Espanola	Rio Arriba	Tim's Trailer Park, Timothy Salazar, Owner, proposes to discharge up to 3,600 gallons per day of domestic wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at Road 1064, Los Luceros, on Hwy 68 approximately ten miles north of Española, in Section 30 (projected), T22N, R09E, at latitude 36.107266, longitude -106.032426, in the Sebastian Martin Land Grant, Rio Arriba County. Ground water beneath the site is at a depth of approximately 80 feet and has a total dissolved solids concentration of approximately 224 milligrams per liter.	Melissa Halick melissa.halick@state.nm.us
1689	Midway Chevron Carlos Martinez, Owner Midway Chevron PO Box 13 Sapello, NM 87745	Sapello	San Miguel	Midway Chevron, Carlos Martinez, Owner, proposes to renew the Discharge Permit for the discharge of up to 4,320 gallons per day of remediated ground water to a disposal system. Potential contaminants from this type of discharge include organic compounds. The facility is located at the southwest corner of the intersection of Highway 518 and Highway 94, Sapello, in in Section 21 (projected), T18N, R16E, at latitude 35.772232, longitude -105.253556, in the Mora Land Grant, San Miguel County. Ground water beneath the site is at a depth of approximately 19 feet and has a total dissolved solids concentration of approximately 1,200 milligrams per liter.	Steve Pedro steven.pedro@state.nm.us
1493	Gabriel's Restaurant	Tesuque	Santa Fe	Gabriel's Restaurant, Sydney Gabriel, Owner, proposes to modify the Discharge Permit for the discharge of up to 5,000 gallons per day of domestic wastewater to a treatment and disposal system. Potential contaminants from this type of	Rebecca Cook rebecca.cook@state.nm.us

	Sydney Gabriel, Owner Gabriel's Restaurant 4 Banana Lane Santa Fe, NM 87505			discharge include nitrogen compounds. The facility is located at 4 Banana Lane, approximately 6.6 miles northwest of Tesuque, on East Frontage Road, Santa Fe, in Section 28, T19N, R09E, Santa Fe County. Ground water beneath the site is at a depth of approximately 85-90 feet and has a total dissolved solids concentration of approximately 273 milligrams per liter.

Provided the applicant has met applicable requirements, the New Mexico Environment Department (NMED) will propose for approval a Discharge Permit containing limitations, monitoring requirements, and other conditions intended to protect ground water quality for present and potential future use. Information in this public notice was provided by the applicants and will be verified by NMED during the permit application review process. NMED will accept comments and statements of interest regarding applications and will create facility-specific mailing lists for persons who wish to receive future notices. Questions, comments or statements of interest should be directed to the NMED permit contact at (505) 827-2900 or at the following address: Ground Water Quality Bureau, PO Box 5469, Santa Fe, NM 87502-5469.
