**RE: APPROVAL AND DETERMINATION OF ADMINISTRATIVELY COMPLETE
REQUEST FOR CLASS 1 PERMIT MODIFICATION WITH PRIOR APPROVAL TO ADD A TREATMENT
PROCESS AT TECHNICAL AREA 50, BUILDING 69
LOS ALAMOS NATIONAL LABORATORY
EPA ID#NM0890010515
HWB-LANL-23-039**

Dear Theodore Wyka and Michael Mikolanis,

On July 19, 2023, the New Mexico Environment Department (NMED) received the United States Department of Energy (DOE), Triad National Security (Triad), LLC, and Newport News Nuclear BWXT-Los Alamos, LLC (N3B) (collectively referred to as the Permittees) *Class 1 Permit Modification Request with Prior Approval to Add a Treatment Process at Technical Area 50, Building 69* (Request) referenced by EPC-DO-23-177/LA-UR-23-25571.

On August 8, 2023, NMED notified the Permittees that the Part A Form must be revised to include the names and signatures of the currently delegated signatories. In addition, an amendment to the treatment capacity in item 6, line X8 was required. On August 24, 2023, the Permittees provided a revised Part A Form, and NMED deems it administratively complete.

This Request is a Class 1* Permit Modification requiring prior approval to update the Permit in accordance with the code of federal regulations (CFR) 40, §270.42, Appendix I, Items D.1.b. The Request is to add a treatment process (T04) to resize oversized waste in a large glovebox located in an indoor unit at Technical Area 50, Building 69 (TA-50-069).

NMED has reviewed the Request and has incorporated the changes into the Los Alamos Hazardous Waste Facility Permit by updating Permit Parts 1-11, and Attachments A, C, G.4, J, and N. The modified Permit is available on the NMED's Hazardous Bureau website at:
