

FACT SHEET
INTENT TO ISSUE A HAZARDOUS WASTE FACILITY PERMIT UNDER THE NEW
MEXICO HAZARDOUS WASTE ACT
ADVANCED CHEMICAL TREATMENT LLC.
ALBUQUERQUE, NEW MEXICO
EPA ID NMD002208627
February 9, 2026

The New Mexico Environment Department (NMED or the Department) intends to issue a hazardous waste Permit (Permit) to Advanced Chemical Treatment, LLC. (ACT, Operator), and Republic EES, LLC (Owner) (collectively, the Permittee) (EPA ID Number NMD002208627) to continue to accept, manage, treat, and store, and transfer off-site generated hazardous waste at their Container Treatment and Storage Facility (the Facility) based in Albuquerque, New Mexico.

Prior to issuing a permit, the NMED is required by regulations to release a draft of the Permit for public comment. The Department is also required to issue a fact sheet, which serves two functions: 1) to facilitate public review of the draft permit; and 2) to provide the basis for any requirements not specified in State Regulations. This is that Fact Sheet.

The initial portion of this fact sheet describes the general background for the revised Permit, including a physical description of the Facility, its hazardous waste activities, the revised draft Permit, and how the public may be involved in its permitting process. The latter portion of this fact sheet provides the technical and regulatory basis for the permit and a description of the Permit Parts.

The Advanced Chemical Treatment, LLC hazardous waste Container Storage and Treatment Facility is located at 6137 Edith Boulevard Northeast, in the City of Albuquerque, Bernalillo County, New Mexico. The facility covers approximately 1.75 acres of land containing 6 storage rooms (Rooms A through F), which occupy 20,699 square feet in a warehouse building comprising offices and restrooms. The facility manages, treats, stores, and transfers hazardous wastes that are regulated under the Federal Resource Conservation and Recovery Act (RCRA), the New Mexico Hazardous Waste Act (HWA), and its implementing regulations, the New Mexico Hazardous Waste Management Regulations at 20.4.1 NMAC.

The draft Permit allows the management, treatment, and storage of hazardous wastes (generally for periods longer than 90 days) at a container storage Facility. The Permittee does not seek, and the NMED is not issuing, a permit for disposal of hazardous waste.

The draft Permit comprises 7 Permit Parts (Parts 1 through 7) and 13 Permit Attachments (A through M). The Permit Parts address how the Permittee must adhere to specific hazardous waste management, treatment, and storage procedures, how the Permittee shall terminate the use of the treatment and storage facilities (referred to as “closure” of the Facility), and how the Permittee shall conduct cleanup (referred to as “corrective action”) of contaminated soil, surface water, or

groundwater, if necessary. The Permit Parts also include general requirements that apply to all permitted hazardous waste management facilities throughout the State of New Mexico (e.g., duration of a Permit) and general requirements that apply to the facility (e.g., characterization of waste).

The Permit Attachments consist of management “plans,” including a waste analysis plan for determining which wastes are hazardous, a contingency plan (emergency response), an inspection plan, a personnel training plan, and a closure plan for the units proposed for permitting. The Permit Attachments also include a list of units that are to be permitted, a list of corrective action sites, and a compliance schedule that lists when the Permittee must complete specific tasks.

The draft Permit requires the Permittee to invoke an emergency response plan (Contingency Plan) when there is a fire, explosion, release of hazardous waste, or any other emergency at the facility that may endanger human health or the environment. Conditions in the draft Permit include required emergency equipment, testing and maintenance of emergency equipment, communication and alarm systems, emergency response procedures, establishment of a chain of command, and post-emergency procedures. However, NMED does not take any part in directing or managing emergency response.

The draft Permit requires the Permittee to notify and cooperate with NMED regarding releases of any hazardous waste or hazardous constituents within the facility. The draft Permit requires ACT to maintain a program that minimizes the amount of waste generated at the facility and reduces the toxicity of such waste.

PUBLIC REVIEW OF THE DRAFT PERMIT

The Administrative Record for this proposed action consists of the Permit Application, the draft Permit, the Public Notice, this Fact Sheet, and supporting documentation. The Administrative Record may be reviewed, with prior appointment, at the following location during the public comment period with prior appointment:

NMED - Hazardous Waste Bureau
2905 Rodeo Park Drive East, Building 1
Santa Fe, New Mexico 87505-6313
Phone: (505) 476-6000
Monday – Friday: 8:00 a.m. to 5:00 p.m.
Contact: Naomi Gonzalez

A copy of the draft Permit, Public Notice, and this Fact Sheet are also available on the NMED website at: www.nmenv.state.nm.us/HWB/actperm.html under *ACT Draft Permit*. To obtain a copy of the Administrative Record or a portion thereof, please contact Ms. Naomi Gonzalez at 505-476-6018, or at the address above. NMED will provide copies, or portions thereof, of the Administrative Record at a cost to the requestor.

NMED issues this public notice on **February 9, 2026** to announce the beginning of a 60-day comment period that will end at **5:00 p.m. MDT, April 10, 2026**. Any person who wishes to comment on the draft Permit or request a public hearing should submit written or electronic mail (email) comments with the commenter's name and address to the respective address below. Only comments and/or requests received before **5:00 p.m. MDT, April 10, 2026**, will be considered.

Neelam Dhawan, Program Manager
Hazardous Waste Bureau
New Mexico Environment Department
2905 Rodeo Park Drive East, Building 1
Santa Fe, New Mexico 87505-6303
Telephone: (505) 476-6000
E-mail: neelam.dhawan@env.nm.gov
Ref: ACT Draft Permit

Written comments must be based on reasonably available information and include, to the extent practicable, all referenced factual materials. Documents in the administrative record need not be re-submitted if expressly referenced by the commenter. Request for a public hearing shall provide: (1) a clear and concise factual statement of the nature and scope of the interest of the person requesting the hearing; (2) the name and address of all persons whom the requester represents; (3) a statement of any objections to the draft Permit, including specific references to any conditions being addressed; and (4) a statement of the issues which the commenter proposes to raise for consideration at the hearing. Written comments and requests for Public Hearing must be filed with Mr. JohnDavid Nance (jd.nance@env.nm.gov) before **5:00 p.m. MDT, April 10, 2026**. NMED will provide a minimum 30-day notice of a public hearing, if scheduled.

All written comments will be considered in formulating a final decision and may cause the draft Permit to be modified. The NMED will respond in writing to all public comments. This response will specify which provisions, if any, of the draft Permit have been changed in the final decision and the reasons for the changes; and briefly describe and respond to all public comments raised during the public comment period. All persons presenting written comments or who requested notification in writing will be notified of the decision by mail. These responses will also be posted on the NMED website.

After consideration of the written public comments that were received, the Secretary of the New Mexico Environment Department may issue a final Permit. The Secretary will make the final decision publicly available and shall notify the Permittee by certified mail. All persons submitting written public comments, who filed an Entry of Appearance, or requested notification in writing, shall be notified of the decision by first class regular mail. The Secretary's decision shall constitute a final agency decision and may be appealed as provided by the Hazardous Waste Act.

ARRANGEMENTS FOR PERSONS WITH DISABILITIES

Any person with a disability requiring assistance or auxiliary aid to participate in this process should contact Kate Cardenas, Non-Discrimination Coordinator no less than ten days prior to the

end of the public comment period at the following address: New Mexico Environment Department, P.O. Box 5469, 1190 St. Francis Drive, Santa Fe, New Mexico, 87502-6110, telephone number: (505) 469-0732, or via email at: nd.coordinator@env.nm.gov. Toll-free numbers are available for TDD or TDY users to access the New Mexico Relay Network at 1-800-659-1779 (voice); TTY users: 1-800-659-8331.

NON-DISCRIMINATION STATEMENT

The NMED does not discriminate on the basis of race, color, national origin, disability, age or sex in the administration of its programs or activities, as required by applicable laws and regulations. The NMED is responsible for coordination of compliance efforts and receipt of inquiries concerning non-discrimination requirements implemented by 40 C.F.R. Parts 5 and 7, including Title VI of the Civil Rights Act of 1964, as amended; Section 504 of the Rehabilitation Act of 1973; the Age Discrimination Act of 1975, Title IX of the Education Amendments of 1972, and Section 13 of the Federal Water Pollution Control Act Amendments of 1972. If you have any questions about this notice or any of NMED's non-discrimination programs, policies or procedures, or if you believe that you have been discriminated against with respect to an NMED program or activity, you may contact: Kate Cardenas, Non-Discrimination Coordinator, NMED, 1190 St. Francis Dr., Suite N4050, P.O. Box 5469, Santa Fe, NM, 87502, (505) 469-0732, nd.coordinator@env.nm.gov. You may also visit our website at <https://www.env.nm.gov/non-employee-discrimination-complaint-page/> to learn how to file a complaint of discrimination.

REGULATORY BACKGROUND

In 1976, the Resource Conservation and Recovery Act (RCRA) was passed by the U.S. Congress to regulate "cradle to grave" management of hazardous waste. RCRA was enacted as an amendment to the Solid Waste Disposal Act of 1965. RCRA mandates the development of regulations governing the actions of owners or operators of facilities that generate, transport, treat, store, or dispose of solid wastes. On May 19, 1980, the RCRA regulations became effective, and it became unlawful to treat, store, or dispose of hazardous waste without having, or having applied for, a permit. The requirement to submit a permit application is satisfied by submitting a "Part A" and "Part B" permit applications. The roles of the Part A and B applications are described in 40 CFR § 270.10. The United States Environmental Protection Agency (EPA) has authorized the State of New Mexico to implement and enforce hazardous waste management requirements, including corrective action requirements, under its own hazardous waste management program. The State's authority for the program is the Hazardous Waste Act (HWA), which: (1) authorizes the State's Environmental Improvement Board (EIB) to adopt hazardous waste management regulations; and (2) authorizes the NMED to implement and enforce regulations issued under the HWA. These regulations are the New Mexico Hazardous Waste Management Regulations (HWMR). The EIB adopted regulations concerning hazardous waste management and the issuance of hazardous waste permits. These regulations incorporate by reference Subtitle C of the Code of Federal Regulations (CFR) Title 40 CFR Parts 260 through 270, 273, and 280 – and are codified in the HWMR, 20.4.1. NMAC. The HWA and HWMR require each person owning or operating an existing facility or planning to construct a new facility for the treatment, storage, or disposal of hazardous waste to have an HWA permit (see 42 U.S.C. 6925 and 20.4.1.900 NMAC (incorporating 40 CFR § 270.1)).

The Advanced Chemical Treatment LLC (ACT) Facility was first permitted in 2011 when it acquired the Facility from Rinchem Company Inc. The HWA and HWMR require corrective action for all releases of hazardous waste or hazardous constituents, regardless of when waste was placed in such a unit, from any solid waste management unit (SMWU) at a facility seeking a permit. (42 U.S.C. § 6924(u); 74-4-4.2(B) NMSA 1978; 20.4.1.500 NMAC, incorporating 40 CFR § 264.101(a)). Corrective action is also required beyond the facility boundary (42 U.S.C. § 6924(v); 20.4.1.500 NMAC, incorporating 40 CFR § 264.101 (c)). On November 8, 1984, the Hazardous and Solid Waste Amendments to RCRA required corrective action at “units” where solid waste had been managed or disposed of regardless of the time that the solid waste was placed at the “unit”.

On January 25, 1985, the State of New Mexico received authorization from the EPA to implement its hazardous waste program under the HWA. 50 Fed. Reg. 1515 (Jan. 11, 1985). Subsequent program revisions were approved effective on April 10, 1990, July 25, 1990, December 4, 1992, August 23, 1994, December 21, 1994, July 10, 1995, January 2, 1996, March 10, 1997, July 13, 1998, October 9, 2001, and October 16, 2007. On January 2, 1996, the State received authorization from the EPA to implement the corrective action program under the HWA. See 60 Fed. Reg. 53708 (Oct. 17, 1995); 61 Fed. Reg. 2450 (Jan. 26, 1996).

PERMIT APPLICATION REQUIREMENTS

Owners and/or Operators of hazardous waste management facilities, including interim status facilities, are required to submit a comprehensive permit application covering all aspects of design, operation, maintenance, and closure of their facilities. A complete Permit Application consists of both Parts A and B. Part A is a standard form that requires the name of the owner/operator, a list of the types of wastes managed, a facility layout diagram, and the activities requiring a permit. Part B is an extensive document submitted in a narrative, tabular, and schematic format that includes general information requirements for all hazardous waste management facilities, as well as unit-specific information. The Part B also includes information necessary to establish corrective action requirements for releases from solid waste management units and areas of concern (SWMUs and AOCs).

ADVANCED CHEMICAL TREATMENT, LLC (ACT) PERMIT HISTORY

The Facility was originally owned and operated by Rinchem Company, Inc., from 1987 to September 2011, solely as a hazardous waste container storage and transfer Facility. In October 2011 NMED approved a permit modification for transfer of the ownership to ACT Property Acquisition Partners V, LLC and the operation of the facility to Advanced Chemical Treatment, Inc. In a letter dated November 16, 2023, Republic Services, Inc, owner of Republic EES, LLC informed NMED about its acquisition of ACT LLC effective November 1, 2023.

On August 12, 2011, ACT submitted to the NMED a Part A Permit renewal application concurrently with a Part B application, which proposed adding fuel blending and hazardous waste treatment in addition to the hazardous waste storage operation. Following NMED review and

several Notices of Deficiency (NODs) sent to the Permittee by NMED, the Department, on January 4, 2018, in a letter to the facility declared the application administratively complete. Following NMED review of the Application for technical completeness, several NODs were sent to the Facility on Financial Assurance Closure Cost Estimates. On January 22, 2026, NMED sent a letter of technical completeness and adequacy determination to the Facility.

Since ACT submitted the Permit renewal application in a timely manner, (i.e., at least 180 days before the expiration of the Operating Permit) and the Application was deemed administratively complete in 2018, the Facility is allowed to continue hazardous waste management operations until the effective date of a new Permit.

PART A PERMIT APPLICATION

The Part A Permit application contains basic information related to the hazardous waste management facility to be permitted, the waste management processes that the Permittee proposes to employ at the storage and treatment areas of the Facility, and the specific EPA Hazardous Waste Numbers or EPA Waste Codes applied to the waste to be managed at those areas.

PART B PERMIT APPLICATION

On August 12, 2011, the Permittee also submitted a Part B Application (along with its Part A) for renewal of their current operating Container Storage Permit for the Albuquerque Facility. The current draft Permit was compiled using the revised August 2022 Permit application. The general Part B Application addresses the requirements that apply to hazardous waste treatment and storage operations at the Facility and contains a description of the Facility and its various operating plans (i.e., waste analysis, inspection, personnel training, contingency plan, closure plan, and corrective action).

The applications, including additional information submitted by the Permittee, and relevant materials reviewed by the NMED together comprise the Administrative Record (“AR”). The AR provides the basis for the draft Permit. The AR is available for review by members of the public during business hours at the offices of the New Mexico Environment Department – Hazardous waste Bureau, 2905 Rodeo Park Drive East, Building 1, Santa Fe, NM 87505.

TYPES OF HAZARDOUS WASTES MANAGED AT THE FACILITY

The Permittee will accept, manage, treat, and store D-listed wastes, except D003 and D009 wastes, and “F-listed waste”, except dioxin regulated waste codes, which include F020 – F023, and F026-F028,” hazardous wastes. The Permittee is prohibited from accepting for management, treatment, and storage the following waste types: Explosive and Shock Sensitive Materials, Radioactive wastes, Infectious/Medical wastes, Etiological, Dioxin and Dioxin-bearing wastes. A complete list of permitted and prohibited waste is presented in Permit Part 4 (Treatment of Hazardous Wastes in Containers, which include Tanker Trucks), and Permit Attachment A (Facility Description).

The criteria for establishing a waste as a hazardous waste are provided in 40 CFR Part 261, incorporated in 20.4.1.200 NMAC. A waste is considered hazardous if it meets the definition of a solid waste described in 40 CFR § 261.2; and is not exempted by 40 CFR § 261.4; and exhibits any of the characteristics of hazardous waste identified in 40 CFR Part 261, Subpart C; or is listed in 40 CFR Part 261, Subpart D.

Hazardous waste types may be of uniform physical composition (i.e., homogeneous) or of dissimilar or diverse composition (i.e., heterogeneous). Homogeneous wastes contain only one material, substance, or waste, and when a sample of the waste is collected, it represents the entire waste type. Homogeneous waste types can be either solids or liquids. Heterogeneous waste types contain multiple components that differ in density, physical form, or other physical properties, are not evenly distributed within the waste or are discrete and different particles. Heterogeneous wastes (e.g., liquids and sludges, debris) do not lend themselves to representative sampling and analysis.

The EPA hazardous waste codes with the prefixes, “D”, and F, identified at 20.4.1.200 NMAC (incorporating 40 CFR Part 261, Subparts C and D), apply to the hazardous waste types received and managed at the Facility. Specifically: (1) D codes denote the characteristics of ignitability (D001), corrosivity (D002), reactivity (D003), and Toxicity (D004-D043). (2) F codes signify wastes from non-specific sources.

TYPES OF UNITS TO BE PERMITTED

The draft Permit would authorize the management, treatment (in tanker trucks, which by EPA standards are containers), and storage of hazardous waste in containers. The types of waste to be treated and stored are described in Permit Attachment B (Authorized Wastes) and summarized above in the previous section.

PERMIT ORGANIZATION

The revised draft Permit comprises 7 Permit Parts (1-7) and 13 Permit Attachments (A-M). The Permit Parts contain terms or permit conditions that the NMED would require the Permittee to adhere to while accepting, managing, treating, and storing hazardous waste, conducting closure, and conducting certain corrective actions at the Facility.

Permit terms are established to ensure compliance with the New Mexico’s HWA and the HWMRs and are derived from applicable regulatory requirements, the Permittee’s commitments, or requirements established by the NMED to ensure adherence to the regulations and to protect human health or the environment as provided at 20.4.1.900 NMAC, incorporating by reference 40 CFR § 270.32(b)(2).

This fact Sheet and the revised draft Permit generally refer to regulations by citing the federal hazardous waste management regulations 40 CFR Parts 260 through 273, rather than the New Mexico Hazardous Waste Management Regulations 20.4.1 NMAC, which incorporate by reference the federal regulations, with certain exceptions. Where relevant, the New Mexico HWMRs are cited directly.

PERMIT PARTS

A description of each of the 7 Permit Parts is presented below:

Permit Part 1: General Permit Conditions contains permit conditions that apply to all hazardous waste management units, most of which are based upon mandatory permit conditions set forth at 20.4.1.500 NMAC, incorporating 40 CFR Part 264, and 20.4.1.900 NMAC, incorporating 40 CFR Part 270.

Permit Part 2: General Facility Requirements contain mandatory permit conditions of operation of hazardous waste management facilities set forth in 40 CFR Part 264, Subparts B through E, and Subparts G, I, and Subpart X. Permit Part 2 references Permit Attachments that provide more information regarding the Facility, namely Permit Attachment A (*Facility Description*), Permit Attachment B (*Authorized Wastes*), Permit Attachment C (*Waste Analysis Plan*), Permit Attachment D (*Contingency Plan*), Permit Attachment E (*Inspection Plan*), Permit Attachment F (*Personnel Training Plan*), Permit Attachment G (*Closure Plan*), Permit Attachment H (*Post-Closure Care Plan for Corrective Action*), Permit Attachment I (*Compliance Schedule*), Permit Attachment J (*Hazardous Waste Management Units*), Permit Attachment K (*Solid Waste Management Units and Areas of Concern Requiring Corrective Action*), Permit Attachment L (*Financial Assurance*), and Permit Attachment M (*Figures*).

Permit Part 3: Storage of Hazardous Wastes in Containers contains the regulatory requirements that the Permittee shall follow when managing and storing hazardous wastes at the Container Storage Units (Rooms A through F). The Permittee is authorized to accept, manage, treat, and store at the storage units only those hazardous wastes listed in Permit Attachment B (*Authorized Wastes*). Permit Part 3 addresses the requirements for managing hazardous waste in containers in accordance with 40 CFR Part 264, and Subpart I. General descriptions of the storage units, process information for the acceptance, management, and storage of hazardous waste and their locations are provided in Permit Attachment A (*Facility Description*).

Permit Part 4: Treatment of Hazardous Wastes in Containers contains the regulatory requirements that the Permittee must follow when managing and treating hazardous wastes at the fuel blending, and solid and hazardous waste consolidation areas. The Permittee is authorized to accept, manage, and treat at the treatment areas only those hazardous wastes listed in Permit Attachment B (*Authorized Wastes*). Permit Part 4 addresses the requirements for managing and treating hazardous waste in containers in compliance with 40 CFR Part 264 Subpart X.

Permit Part 5: Closure Plan contains the requirements for final closure of the Facility under 40 CFR §§ 264.110 through 264.116, 264.178, 264.197, and 264.603, as applicable, this Permit Part (5), and the procedures described in the closure plan in Permit Attachment G (*Closure Plan*).

Closure is the permanent discontinuation of the treatment and storage of hazardous wastes at a Facility and is a result of the removal of all hazardous wastes from the Facility, the decontamination or removal of associated structures and equipment, and, if necessary, corrective

action of contaminated environmental media, such that the Facility is left in a condition that is protective of human health and the environment.

Permit Part 6: Post-Closure Care Requirements - Reserved

Permit Part 7: Corrective Action requires the Permittee to implement corrective action as necessary to protect human health and the environment for all releases pursuant to 42 U.S.C § 6924(u) and (v), 40 CFR § 264.101, Subparts F and S, including (1) new releases of hazardous waste or hazardous constituents to the environment, from operating or closed units at the Facility.

These requirements also include the processes of implementing corrective action, cleanup levels, general methods, and procedures for conducting field activities, laboratory procedures, general procedures for conducting risk assessments and determining background levels, general requirements for drilling and well installation, and requirements for reporting on corrective action activities conducted under this Permit.

PERMIT ATTACHMENTS

Permit Attachment A contains a detailed description of the Hazardous Waste Management Facility. The Permittee supplied descriptions of each hazardous waste management area in its permit application, including the dimensions, amount of hazardous waste to be managed in each treatment and storage area, materials of construction, security procedures, and emergency equipment.

Permit Attachment B, Authorized Wastes lists the U.S. EPA Hazardous Waste Numbers/Waste Codes authorized to be managed by the Permittee at each hazardous waste management area.

Permit Attachment C, Waste Analysis Plan, fulfills the requirement contained in 40 CFR § 264.13(c) for a “written waste analysis plan, which describes the procedures that the Permittee will use to comply with requirements of 40 CFR § 264.13(a) to obtain a detailed chemical and physical analysis of a representative sample of the wastes. The Permittee may also use various published data with periodic verification. The waste analysis plan under 40 CFR § 264.13(c) must specify the following:

1. Parameters for which waste will be analyzed and the rationale.
2. Test methods.
3. Sampling methods.
4. The frequency at which the initial analysis will be reviewed and repeated.”

Permit Attachment D, the Contingency Plan is required by 40 CFR §§ 264.51 and 264.52. Under 40 CFR § 264.52, the contingency plan must describe the actions facility personnel will take in response to fires, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous constituents to air, soil, or surface water at the Facility. The plan describes arrangements with local first responders, the list of qualified emergency coordinators, list of emergency equipment, and includes an evacuation plan.

Permit Attachment E, the Inspection Plan, responds to the regulatory requirement that the “owner or operator must develop and follow a written schedule for inspecting the treatment and storage containers, monitoring equipment, safety and emergency equipment, security devices, and operating and structural equipment (such as dikes and sump pumps) that are important for preventing, detecting, or responding to environmental or human health hazards.

Permit Attachment F contains the **Personnel Training Plan**, which is required to meet the terms of 40 CFR § 264.16(d)(3), which calls for a “written description of the type and amount of both introductory and continuing training that will be given to each person filling a position” related to hazardous waste management. The Permittee submitted a training plan with their permit application.

Permit Attachment G contains the **Closure Plan** for the hazardous waste treatment and storage Facility. Closure Plans are required at 40 CFR § 270.14(b)(13) to be included in a Part B permit application and must address the closure performance standards at § 264.111, the specific contents at § 264.112(b), the schedule at § 264.113, and the container-specific requirements under 40 CFR § 264.178.

Permit Attachment H - Reserved

Permit Attachment I - Reserved

Permit Attachment J lists the hazardous waste management units at the Facility. The Attachment includes one Table: 1) Table J-1.1, which shows the active portion of the facility and lists active units including those treating and storing hazardous waste in containers.

Permit Attachment K comprises three lists of solid waste management units (SWMUs) and areas of concern (AOCs): (a) those units requiring corrective action, (b) those units where corrective action is complete with controls, and (c) those units where corrective action is complete without controls. Currently the Facility does not have any SWMUs nor AOCs.

Permit Attachment L contains the Advanced Chemical Treatment LLC (ACT) Closure Cost Estimate and copies of the *Performance Bond*, *Trust Agreement*, *Schedule A*, *Schedule B*, *Commercial Bank Statement*, and the *Certificate of Liability Insurance*. These documents demonstrate ACT’s financial assurance. This information was submitted to the New Mexico Environment Department (Department) by the Permittee, as required by 40 CFR Part 264, Subpart H (Financial Requirements), and 40 CFR § 270.14(b)(17).

Permit Attachment M contains the Figures referenced elsewhere in the Permit and photographs of the areas where hazardous waste is managed.
