[Installer Specialist Certificate of Registration.docx](#)

Notes:

1. Any MM1, MM98, MS1 or MS3 licensed company can install or inspect conventional liquid waste systems. A licensed company may or may not employ a listed Installer Specialist.
2. This list of Installer Specialist are those that have a license and additional qualifications beyond those required for a licensed company.
3. The Installer Specialist can perform unpermitted system inspections for systems installed prior to 2/1/2002

Installer Specialist Qualifications

The individuals have met the qualifications required to become an Installer Specialist pursuant to Section 904 of 20.7.3 NMAC the Liquid Waste Treatment and Disposal Regulations.

- A valid and appropriate classification of contractor license issued by CID;
- Experience in the construction of on-site liquid waste systems as outlined in Section 904(B)(2);
- Completion of a 20.7.3 NMAC training class and examination;
- Completion of 16 hours of training credits approved by NMED within past 3 years;
- No compliance orders within past 3 years and no criminal convictions within past 5 years
