New Mexico Occupational Health and Safety Bureau (OHSB) Directive 24-02

Subject: State Emphasis Program (SEP) for Health and Safety Hazards in the Construction Industry (NAICS 236, 237, and 238).

- A. Purpose: This notice establishes an SEP for Health and Safety Hazards in the Construction Industry (NAICS 236, 237, and 238).
- B. Scope: This notice applies to the State of New Mexico OHSB.
- C. References: The following documents are referenced in or applicable to this instruction.
  - 1. New Mexico Field Operations Manual
  - 2. OSHA Information System (OIS) Modules for Enforcement, Consultation and Compliance Assistance, current and subsequent versions.
  - 3. OSHA Instruction CPL 2-0.102.A, November 10, 1999, Procedures for Approval of Local Emphasis Programs (LEP).
  - 4. OSHA Instruction CPL 2-00-051, February 23, 2005, Exemptions and Limitations Under the Appropriations Act, with current Appendix A.
- D. Cancellation: This notice cancels the New Mexico Occupational Health and Safety Bureau (OHSB) Directive 23-02 dated October 1, 2023.
- E. Expiration: This notice expires on September 30, 2024 but may be renewed as necessary.
- F. Action: OHSB personnel will ensure that the procedures contained in this notice are followed in conducting the SEP for Health and Safety Hazards in the Construction Industry (NAICS 236, 237, and 238).
- G. Background: Through activities at construction sites statewide, the OHSB has identified serious hazards including falls, struck by, and struck against objects. These hazards have resulted in serious injuries and fatal accidents. It is believed that, through a local emphasis program, increased awareness, and accelerated

intervention activities, injuries and illnesses can be reduced. It is also recognized that the tracking mechanism for these types of inspections would prove beneficial in monitoring of the hazards.

- H. Compliance: In FY 2024, the OHSB will conduct approximately 115 inspections from a list of all employers in NAICS 236, 237, and 238.
1. OHSB will conduct comprehensive inspections at construction sites and include all companies onsite that are not covered by inspection deferral as provided in the OHSB Strategic Partnership for Construction (OSPC).
  2. Hazards on construction sites are normally transient and of limited duration. Inspections conducted under the SEP will be initiated by several means: programmed planned inspections from Dodge Reports, supplemented by compliance personnel observation to verify worksite activity; programmed planned inspections at sites identified through New Mexico Department of Transportation reports; instances where OHSB staff view hazards covered by this directive during their workday; complaints; and referrals from outside sources.
  3. Upon arrival at the worksite and before initiating enforcement activities, the compliance officer will determine that Enforcement Exemptions and Limitations under the Appropriations Act do not prohibit the inspection. Certain employers are exempt from programmed safety inspections if they employ 10 or fewer employees currently and at all times during the 12 months prior to an inspection.
  4. OHSB reserves the right to re-inspect any establishment that has a fatality, reportable injury or illness, or receives a complaint or referral, at any time during the period covered by this notice.
- I. Outreach: The Compliance Assistance Specialists should conduct a minimum of twenty-five (25) activities per year such as:
1. Conducting outreach activities at annual conventions for industry associations;
  2. Developing and distributing outreach materials and publications;
  3. Developing materials to include on the OHSB web page;
  4. Conducting formal and informational presentations and training in collaboration with industry associations; and,
  5. Providing technical assistance.
- J. Consultation: The OHSB Consultants will conduct a minimum of twenty (20) activities per year such as:
1. Assigning a high priority to consultation requests from construction;
  2. Conducting consultation visits;

3. Participating in industry association conventions to solicit consultation requests and to distribute outreach materials;
4. Creating and distributing mailings explaining compliance section focus on healthcare and availability of resources to include compliance assistance and consultation services;
5. Distributing electronically developed outreach materials;
6. Conducting formal and information presentations and training as requested; and,
7. Providing technical assistance.

K. OIS Recording: Information pertaining to this SEP shall be recorded in the OIS following current instructions in the each of the respective modules in the OIS User Guides. The identifier code will be "ALLCNSTR".

L. Evaluation: An evaluation of the effectiveness of this SEP will be conducted at the end of each fiscal year. An evaluation report will be written and submitted to the Bureau Chief within 90 days of the end of each fiscal year. The evaluation report may be included as part of the New Mexico State OSHA Annual Report (SOAR). Elements to be considered in the evaluation include:

1. Number of inspections conducted under this SEP;
2. Number of serious, willful, and repeat violations issued as a result of these inspections;
3. Number of in-compliance inspections;
4. Number of employees removed from risk;
5. Number of hazards abated; and
6. Change in injury, illness and fatality rates within the industry and among companies receiving inspections, using case file and Bureau of Labor Statistics data.

By and Under the Authority of

Robert Genoway  
Chief, Occupational Health and Safety Bureau
