Good afternoon Ms. Jones,

Hope this message finds you and family well and safe.

We must stop this attempt after decisions were made in May to say **NO!!!** Now oil and gas is again trying to get the green light to be allowed to dump radioactive toxic waste onto NM lands, agriculture and into our rivers, aquifers, lakes, arroyos, acequias and drinking water. No further Tribal Consultation, scientific review or public engagement has occurred. Where is our Democratic process? This is potential **Ecocide** about to happen and an environmental disaster that our Land of Enchantment and New Mexicans may never recover from. As you well know, Radioactive decay takes thousands of years. Big and small oil and gas must not be allowed to contaminate our Sacred and precious New Mexico water, land and agriculture. We must focus on remediation of the tens of thousands of wells that will be left and or abandoned by oil and gas for NM taxpayers to live with and clean up. Where will we get the Billions of dollars needed to do so?

Ahee'hee, Respectfully,

Terry
