Re: Final Decommissioning Plan
Thermo Eberline LLC, License No. SO067-36
5981 Airport Road Facility
Santa Fe, New Mexico

Dear Dr. Paladugu:

CN Associates Inc. (CN), on behalf of Thermo Eberline LLC (Company/Licensee), is pleased to submit to the New Mexico Environment Department (NMED) Radiation Control Bureau (Bureau) the attached Final Decommissioning Plan (DP), in support of radiological decommissioning of the Company's facility located at 5981 Airport Road, Santa Fe, New Mexico (site). This DP includes updates to the DP submitted to NMED dated January 31, 2025 in response to NMED review and comment and Licensee responses included in Appendix G.

In response to our video conference meeting on Tuesday May 27, 2025, the Licensee understands that with incorporation of the response in Appendix G, NMED accepts this DP as final, and that the Secretary will give notice to the public for a period of at least 30-days and may determine that a public hearing is necessary to address public interest.

The schedule presented in the Final DP conservatively assumes NMED approval of the DP by license amendment to be issued on or before the end of December 2025 in order to initiate site decommissioning work in January 2026 and complete license termination within the 24 months required under NMAC. Should NMED approve the Final DP earlier in 2025, the Licensee will be ready to commence decommissioning work promptly.

We appreciate NMED's support in site decommissioning and look forward to our continued successful collaboration with the NMED RCB to complete decommissioning necessary to terminate License No. SO067-36 in a safe and reliable manner and to transition the property back into unrestricted beneficial use.

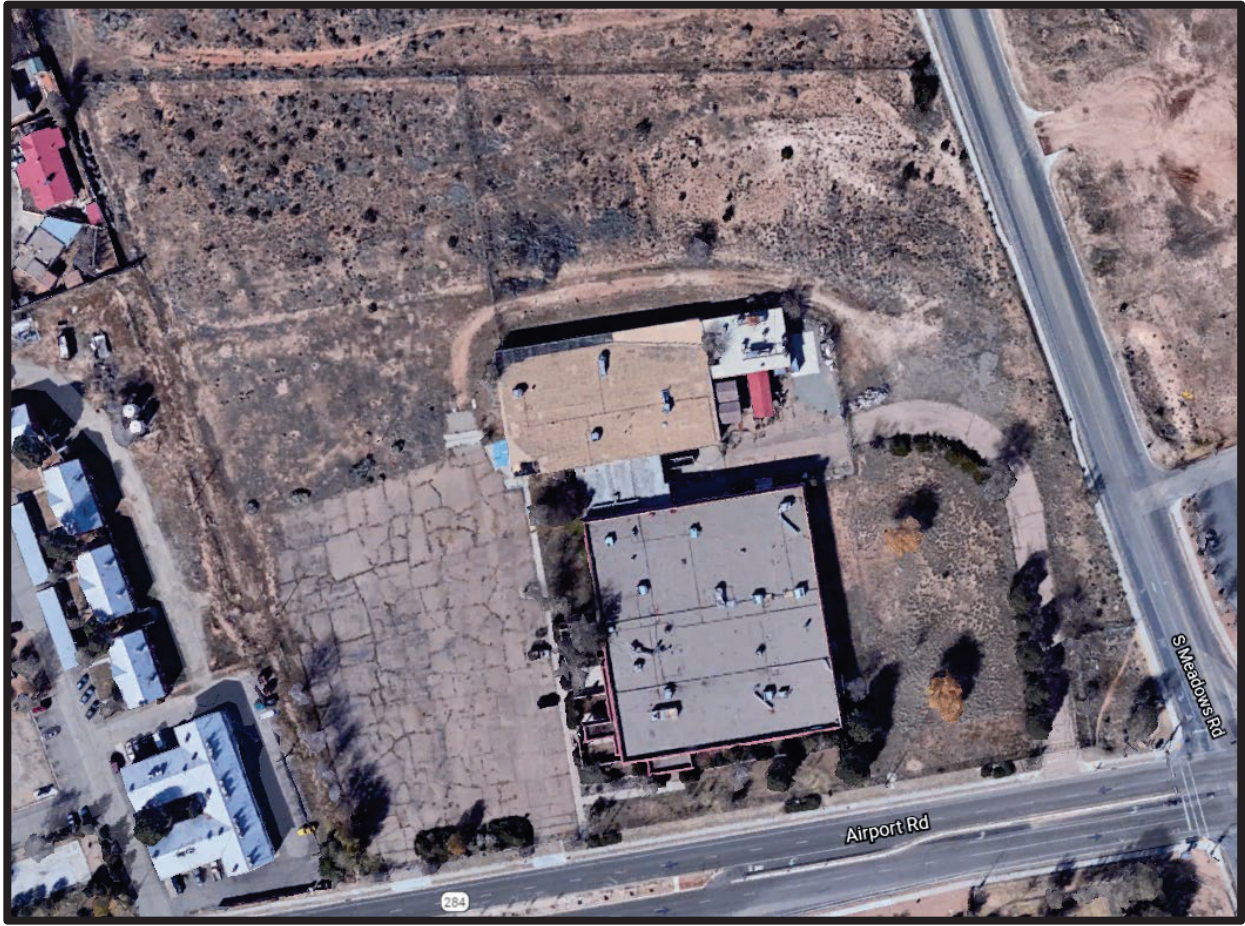

Sincerely,

Ron Cardarelli
