**EFFECTIVE DATE:** July 17, 2019

**REVISION DATE:** N/A

  
Santiago Rodriguez  
Chief, Radiation Control Bureau

## Element 1 – Public Involvement Plan (PIP) Overview

The New Mexico Environment Department (NMED or Department), Radiation Control Bureau (Bureau or RCB) has developed this PIP for the application for a Radioactive Material License for Crest Pumping Technologies, LLC.

The purpose of this PIP is to plan for providing public participation opportunities and information that may be needed for the community to participate in the licensing process for this facility. This PIP identifies information about the community and resources required by the Bureau to incorporate community participation activities into the decision-making process. This PIP developed by the Department's *Public Participation Policy* (Policy 07-13 or Policy), and includes the requirements of the Policy, as well as applicable regulatory and statutory public participation requirements.

This PIP implements the “elements” outlined in the Policy. Those elements include:

1. An overview of the Public Involvement Plan for the community affected by the activity
2. Bureau contact names and contact information, specifically for Limited English Proficiency (LEP) language assistance services (e.g., translation, interpreters) or for disability accommodations
3. A summary of the regulatory public participation framework associated with radioactive material licenses
4. A description of community/stakeholder groups based on results of a preliminary environmental justice (EJ) screening
5. Details about planned public outreach activities

The Bureau will adhere to the public participation requirements for the licensing process by following this PIP, which includes all applicable policy, regulatory and statutory public notice and participation requirements. The PIP identifies the Department staff and resources needed to accomplish these activities.

Upon determination of the New Radioactive Material License Application for Crest Pumping Technologies, LLC for measurements of the density of fluid using sealed radioactive sources, the Department will give notice pursuant to Subsection B of 20.3.3.310 NMAC Public Notices, Participation and Hearing. Subsection B, Paragraph (2) provides for notifications to the public published in at least one newspaper of general circulation in the area of the proposed activity for the new license application, and in other newspapers, as deemed appropriate by the Department Secretary. Also, the Department will post an electronic Public Notice in English and Spanish on its web site <https://www.env.nm.gov/rcb/> for the period defined in this PIP.

The Public comment period pursuant to 20.3.3.310 NMAC, Subsection E, for the New License Application deemed administratively complete, will be for a period of at least 30 days. During the 30 days, written comments or questions about the license application may be submitted by any

interested person. If the Secretary determines there is significant public interest, or there is a need to resolve issues not resolvable in writing, the Secretary shall order a public hearing be held to provide guidance on any matter relevant to the license proceeding. Any such public hearing shall be conducted pursuant to the hearing procedures in 20.1.4 NMAC.

Notice of the public hearing shall be given at least 30 days before the hearing to the persons and in the manner specified in Subsection C, 20.1.4.200 NMAC.

If the Secretary determines the questions are relevant to the requirements in 20.3.3.307 NMAC, 20.3.3.308 NMAC and any specific requirements for the type of license requested, the Secretary shall require the applicant to answer them.

The notices shall include:

- (1) the name and address of the applicant;
- (2) the location of the proposed activity;
- (3) a brief description of the procedures to be followed by the Secretary in making a final determination;
- (4) a brief description of the proposed activity;
- (5) the time within which written comments and requests for public hearings will be accepted; and
- (6) the means by which interested persons may obtain further information;
- (7) the following sample notice satisfies these requirements:

## **PUBLIC NOTICE**

The New Mexico Environment Department (NMED or Department) has received an application for a Radioactive Material License from Crest Pumping Technologies, LLC located at 3424 NW County Road, Hobbs, New Mexico and temporary job sites for measurements of the density of fluid using sealed radioactive sources.

During the early part of the evaluation period, the Department will review and comment upon the application. The NMED may, at its discretion, retain consultants to assist it in its evaluation of the application. Relevant comments and questions, received by the NMED from various agencies and interested parties, will be forwarded to the applicant for its response. Correspondence associated with the application will be on file with the Radiation Control Bureau and will be available for inspection by the applicant and any other interested parties (refer to Element 2 of this PIP). The Department has required the applicant to provide complete plans and other materials addressing, among other things, the public health, safety, and environmental aspects of the proposed activity. The Department will analyze the license application carefully. During this analysis, the application will be reviewed to ensure there are no deficiencies, the application meets all applicable requirements, and there is no reason to believe the operation will violate any laws or regulations. If the Department approves the application, it will issue a Radioactive Material License, to expire in five years. The activities of all licensees are inspected periodically to assure compliance with

regulations and license conditions. The application is available for review at NMED's office of the Radiation Control Bureau in Santa Fe, New Mexico (refer to Element 2 of this PIP).

It is anticipated that the review period will require approximately one month. Written comments and requests for a public hearing will be accepted for thirty days after publication of this notice. Written comments regarding this license application should be directed to Radiation Control Bureau, Environment Department, Attention of Victor Diaz, P.O. Box 5469, Santa Fe, New Mexico 87502-5469.

In developing this PIP, community participation needs were assessed to ensure appropriate promotion of public outreach by identifying whether there is a combination of environmental and demographic factors (i.e., low-income community, minority community, limited English proficiency individuals, linguistically isolated households) possibly impacting public participation (refer to Element 3 of this PIP). This assessment identifies community outreach needs and provides for public access opportunities above and beyond statutorily mandated requirements and underscores the provision of adequate public access to information about the licensing process.

The site for Crest Pumping Technologies, LLC is in a City with a relatively large community of Spanish speakers, and the Bureau will provide pertinent information in both English and Spanish in public notices and related announcements.

At any time during the licensing process, the Applicant and relevant documents may be reviewed at the repository identified in Element 2 — Bureau contact of this document.

The Chief of the Radiation Control Bureau provides the final approval of the PIP and amendments. This PIP is a "living" document able to be amended after considering public comments and feedback.

The Bureau plans to conduct the public involvement activities related to the licensing process outlined in the *Table of Public Involvement Activities* below. The activity timeline and dates are tentative and subject to change.

**Table of Public Involvement Activities**

<b>Activity</b>	<b>Date</b>

## Element 2 – Bureau Contact Information

### PIP Specific Contacts

The Bureau contact for this radioactive material license is:

Victor Diaz, Environmental Scientist - Specialist  
 NMED Radiation Control Bureau  
 P.O. Box 5469, Santa Fe, NM 87502-5469  
 (505) 476-8601  
[Victor.Diaz@state.nm.us](mailto:Victor.Diaz@state.nm.us)

### Non-English Language Speaker Assistance

All public notices will contain a statement that non-English speakers may call the Bureau contact listed above and request language assistance to learn more about this license or the licensing process. Arrangements may be made for document translation or interpretation related to the licensing process as necessary and as resources allow.

### Individuals with Disabilities Assistance

All public notices will contain a statement that disabled individuals may call the Bureau contact listed above and request assistance needed to participate in activities associated with the licensing process.

The following information will be provided in public notices so that hearing-impaired callers can contact the Bureau and ask questions about the activity or proceeding: Toll-free numbers are available for TDD or TTY users to access the New Mexico Relay network (for deaf or hearing-impaired callers), 1-800-659-1779; TTY users: 1-800-659-8331.

## Websites

Outreach materials and notices will include links to the following website, where the Bureau’s public notices and PIP information are posted:

Radiation Control Bureau – <https://www.env.nm.gov/rcb/public-notices>

## Element 3 – Regulatory Framework for Public Participation Related to the Licensing Process

The regulations in 20.3.3.307, 20.3.3.308, and 20.3.3.310 NMAC identify public participation regulatory framework associated with the licensing process.

The Radiation Protection Act (NMSA 1978, § 74-3-9) and the Radiation Control Bureau (20.3.3.310 NMAC) address notice to be provided by the Bureau to the public regarding the submittal of a Radioactive Material facility license application. This notice is provided at the start of the licensing process and informs the public that the Bureau’s review of the license application has begun. It is common practice for the Bureau to provide notice of the submittal of a license application in English and Spanish. The Bureau is required to provide notice in the following manner:

**Table of Regulatory Framework for Public Involvement Activities**

Activity	Dates
<p><sup>1</sup>Application Notice (PN-1) Public Notice Participation and hearing 20.3.3.310.A, B, and C NMAC – Bureau’s obligations at 20.3.3.310 NMAC</p> <ul style="list-style-type: none"> <li>• Signs (PN-1 synopsis<sup>1</sup> in English) - Applicant obligation</li> <li>• Mailings to owners of nearby properties - Applicant obligation</li> <li>• Newspaper display ads (PN-1 summary in English &amp; Spanish)- Bureau’s responsibility</li> <li>• NMED website <a href="https://www.env.nm.gov/rcb/public-notices-of-radioactive-material-licensing-actions/">https://www.env.nm.gov/rcb/public-notices-of-radioactive-material-licensing-actions/</a></li> <li>• Notice to government agencies (as required)</li> <li>• Notice to interested parties (as required)</li> </ul>	<p>Within 60 days of the department deeming the application administratively complete.</p>

<p><a href="https://www.env.nm.gov/rcb/public-notices-of-radioactive-material-licensing-actions/">https://www.env.nm.gov/rcb/public-notices-of-radioactive-material-licensing-actions/</a></p> <ul style="list-style-type: none"> <li>• Newspaper legal ads</li> <li>• Notification of interested parties</li> <li>• Notice to government agencies (as required)</li> <li>• Notice to Indian Tribes, Pueblos and Nations (as required)</li> </ul>	
<p>Public Hearing Notice (if required): Upon the Department’s determination that there is a substantial public interest in the license – obligation at 20.3.3.310.F NMAC</p> <ul style="list-style-type: none"> <li>• NMED website <a href="https://www.env.nm.gov/rcb/public-notices-of-radioactive-material-licensing-actions/">https://www.env.nm.gov/rcb/public-notices-of-radioactive-material-licensing-actions/</a></li> <li>• Newspapers</li> <li>• Notice to interested parties</li> <li>• Notice to government agencies (as required)</li> <li>• Notice to Indian Tribes, Pueblos and Nations (as required)</li> </ul>	<p>Notice of the hearing shall occur at least 30 days prior to the hearing.</p>

<sup>1</sup> Suitable for display, the abbreviated format of the PN-1 synopsis does not contain all the information provided by a full public notice, e.g., language assistance or non-discrimination information.

**NMSA 1978, 74-3-9 Licensing of Radioactive Material; appeal;**

- A. It is unlawful for a person to possess, use, store, dispose of manufacture, process, repair or alter any radioactive material unless he holds:
  - 1. A license issued by the Nuclear Regulatory Commission and notification by the licensee to the agency of license identification;
  - 2. A license issued by an agreement state and notification by the licensee to the agency of license identification; or
  - 3. A license issued by the agency.
- B. The agency shall issue a license, collect license, registration and other related fees and deposit those fees in the Radiation Protection Fund and shall approve requests for reciprocity in accordance with procedures prescribed by rule of the board. License applications shall be made on forms provided by the agency. The agency shall not issue a license unless the applicant has demonstrated the capability of complying with all applicable rules of the board.
- C. The board may, by rule, establish radiation license, registration, and other related fees and exempt from the requirements of licensure specific quantities of any radioactive material determined by the board not to constitute a health or environmental hazard.
- D. The holding of a license issued by the agency, the nuclear regulatory commission or an agreement state does not relieve the licensee from the responsibility of complying with all applicable rules of the board.

- E. A person who is or may be affected by licensing action of the agency may appeal to the district court pursuant to the provisions of Section 39-3—1.1 NMSA 1978.

**Element 4 – Description of Community/Stakeholder Groups Based on the EJSCREEN**

**EJSCREEN Summary**

The purpose of EJSCREEN summary is to provide for adequate public participation opportunities and meaningful involvement of persons in the licensing process, and the affected communities must first be identified, informed about proposed environmental actions affecting the community, and invited to share their comments and concerns. The EJSCREEN tool developed by the U.S. Environmental Protection Agency (EPA) helps identify communities that are low income, have minority populations, and have limited English proficiency that may benefit from a variety of approaches for notification and outreach communication. This information is used to help plan for the community’s involvement in the public process for environmental activities or actions. In addition to the EJSCREEN results, the Bureau may consider additional information such as the U.S. Census Bureau website or NMED’s EJ Mapping Tool.

The Bureau considers the affected community to be those persons living within a 4-mile radius of Crest Pumping Technologies, LLC facility located at 3424 NW County Road, Hobbs, New Mexico. The results of the EJSCREEN American Community Survey (ACS) Summary Report (attached to this PIP) summarized in the table below.

**EJSCREEN Results for the Affected Community**

Total population	40,226
Total number of households	12,490
Percentage minority population	62%
Percentage Hispanic population	54%
Percentage of the population by race	Population reporting one race: White: .....87% Black: .....5% American Indian: .....1% Asian: .....0% Pacific Islander: .....0% Some Other Race: .....4%
Total number of persons greater than the age of five who speak English “less than very well”	4,366
Percentage of persons greater than the age of five who speak English “less than very well”	12%

Total number of linguistically isolated households	747
Percentage of linguistically isolated households (Total number of linguistically isolated households ÷ total number of households X 100)	5.9%
Languages by percentage in linguistically isolated households	Spanish: ..... 97% Other Indo-European languages: ..... 1% Asian-Pacific Island languages: ..... 1% Other languages: ..... 2%
Percent linguistically isolated population, New Mexico*:	5.4%
Per capita income	\$24,140
Per capita income, USA**	\$29,979

\* U.S. Census Bureau. 2011-2015 American Community Survey 5-Year Estimates, Table S1602. Limited English Speaking Households. [https://factfinder.census.gov/bkmk/table/1.0/en/ACS/15\\_5YR/S1602/0400000US35](https://factfinder.census.gov/bkmk/table/1.0/en/ACS/15_5YR/S1602/0400000US35) (date of access: 7/26/2018).

\*\* U.S. Census Bureau. 2015 American Community Survey 1-Year Estimates, Table S0201. Selected Population Profile in the United States. [https://factfinder.census.gov/bkmk/table/1.0/en/ACS/15\\_1YR/S0201/0100000US](https://factfinder.census.gov/bkmk/table/1.0/en/ACS/15_1YR/S0201/0100000US) (date of access: 7/26/2018).

The EJSSCREEN results indicate that for the affected community, the proportion of the population with limited English proficiency (LEP) is significant and that the predominant non-English language is Spanish. The Bureau has therefore performed an LEP assessment for the community and attaches that assessment to this PIP.

Because the affected community has a significant percentage of persons with difficulties communicating in English, the Bureau will consider the language and communication needs of this community when conducting public outreach and participation activities. To accomplish this the Bureau, to the extent its budget and time limitations allow, will provide the same information in Spanish as in English in public comment notices, public meeting notices, and other announcements (e.g., radio broadcasts, brochures, signs, postcards) and will strive to make public participation efforts as inclusive as possible. See Element 5 for more specifics on public outreach and participation activities.

## Element 5 – Detailed Actions and Outreach Activities with the Affected Public

Public involvement activities required by statute or regulation for this licensing action is listed in the *Table of Regulatory Framework for Public Involvement Activities* referenced in Element 3 of this document.

## Public Participation – Outreach Activities

The Bureau will conduct the following outreach activities during this licensing process:

- Placement of this PIP on the Bureau website and in nearby NMED RCB office
- Postal mailing notices
- Newspaper notices
- Notice posted on NMED website

Newspapers to be utilized in the notification process include:

- Statewide circulation: Albuquerque Journal

Local, state, and federal government agencies, tribal entities, and land grant officials will be notified about the licensing process. A list of the agencies and officials can be provided upon request.

Indian Tribes, Pueblos and Nations will be notified about the licensing action through the contacts maintained by the Indian Affairs Department at the following URLs:

<http://www.iad.state.nm.us/apaches.html>

<http://www.iad.state.nm.us/navajo.html>

<http://www.iad.state.nm.us/pueblos.html>

Timelines and methods for submitting public comments are specified in the *Table of Mandated Public Involvement Activities*. Final radioactive material license documents will be available from the Bureau's contact identified in Element 2 of this PIP.

### Postal Mailing or E-Mailing of Notices to Persons on the Facility-Specific Mailing List

The Bureau solicits the names and contact information of interested parties with all public notices. The Bureau maintains those names on a Facility-Specific Mailing List and provides the individuals with information about regulatory activities for the facility. Individuals, organizations, and other interested parties are added to the mailing list as requested. All public notices will contain a statement directing interested individuals to contact the Bureau contact for this license if they want to be added to the facility specific mailing list.

Other means of outreach such as fliers announcing public comment periods or public meetings, or hearings may be posted in locations throughout the community (e.g., local businesses, schools, libraries) and on the Department's website, at the Bureau's discretion after consideration of public interest and input.

**Attachments**

- LEP Assessment
- A copy of the EJSCREEN ACS Summary Report and a map showing the area evaluated

## Limited English Proficiency (LEP) Assessment

Facility: Crest Pumping Technologies, LLC

### Factor 1: The Number and Proportion of LEP Individuals Eligible to be Served or Likely to be Encountered in the Community of Concern

See Public Involvement Plan (PIP), Table of EJSSCREEN Results for the Affected Community.

#### Conclusions:

1. The number of LEP individuals (persons over the age of 5 who speak English "less than very well" in the affected community) is 4,366.
2. The percentage of LEP individuals in the affected community is 10.9%.
3. The percentage of linguistically isolated households is 5.9%, which is somewhat greater than the statewide average.
4. Spanish is the predominant non-English language spoken by LEP persons.
5. Historical participation: This application is for a new license, so the Bureau does not have a historical record. No one has yet requested to be placed on a facility-specific mailing list.

### Factor 2: Frequency with which LEP Individuals Might Come in Contact with the Program

Contact with the radioactive material licensing process primarily occurs when a license application is under review. The RCB provides notice to the public and encourages participation. Individuals may participate by requesting information, submitting comments on draft licenses, requesting hearings, and taking part in hearings. Most licenses do not generate public interest, and participation is low for most licenses. Historical participation in licensing activities for this facility is summarized under Factor 1. Historically based on the processing of new license applications from December 2003 to current application no public hearings were held as specified pursuant to 20.3.3.310 NMAC.

#### Conclusion:

LEP participation and overall public interest in this facility have been limited historically. Based on this record, the Bureau considers the potential for LEP contact with the licensing process to be "infrequent."

### Factor 3: Nature and Importance of the Activity or Service Provided by the Program

The licensing activity is deemed by the RCB to be "important" to NMED, the impacted community, and the State of New Mexico. The licensing activity (as required by 20.3.3 and 20.3.3.310 NMAC) is essential to NMED because the license establishes site-specific requirements that must be met to ensure protection of public health, safety and provides a means to enforce those requirements. The licensing activity is vital to the impacted community because poorly-regulated radioactive material facilities have the potential to pose a public nuisance and adversely affect the quality of

life of people living in the vicinity of the facility. The licensing activity is important to the State of New Mexico because establishment of valid licenses ensures that radioactive materials will not impact the State's worker, the public, the environment, and that waste disposal and decommissioning is conducted safe and consistent manner adhering to 20.3 NMAC regulations throughout the State.

Conclusion:

The RCB considers the licensing activity “important” to NMED, to the state as a whole, and the impacted community.

**Factor 4: Resources Available to NMED for LEP Services and Associated Costs**

For outreach to LEP communities associated with this license action, NMED employs an in-house Spanish translator/interpreter and utilizes a phone interpretation service to assist during direct communication between LEP individuals and NMED staff in many other languages. The costs of newspaper publication of public notice in Spanish and of interpretive services for a public meeting or hearing are incorporated into the Bureau’s budget, to the extent possible. Fees collected from the licensee by the schedule in 20.3.16 NMAC are limited and may be sufficient to cover these costs.

Conclusion:

The Bureau may accommodate the costs of the LEP services identified in this plan but is limited to one outreach per year. If additional services are requested, the budgetary implications will be reviewed.

**LEP Services Plan:**

To accommodate the needs of the LEP individuals who may be interested in this licensing process, the Bureau plans to:

1. Translate the Public Notice Two (PN-2) and any subsequent public notices into Spanish and publish in a paper serving the local community.
2. Provide interpretive services at any public meeting or public hearing, if requested.
3. Interact with members of the LEP community using certified interpreters, when needed and feasible.

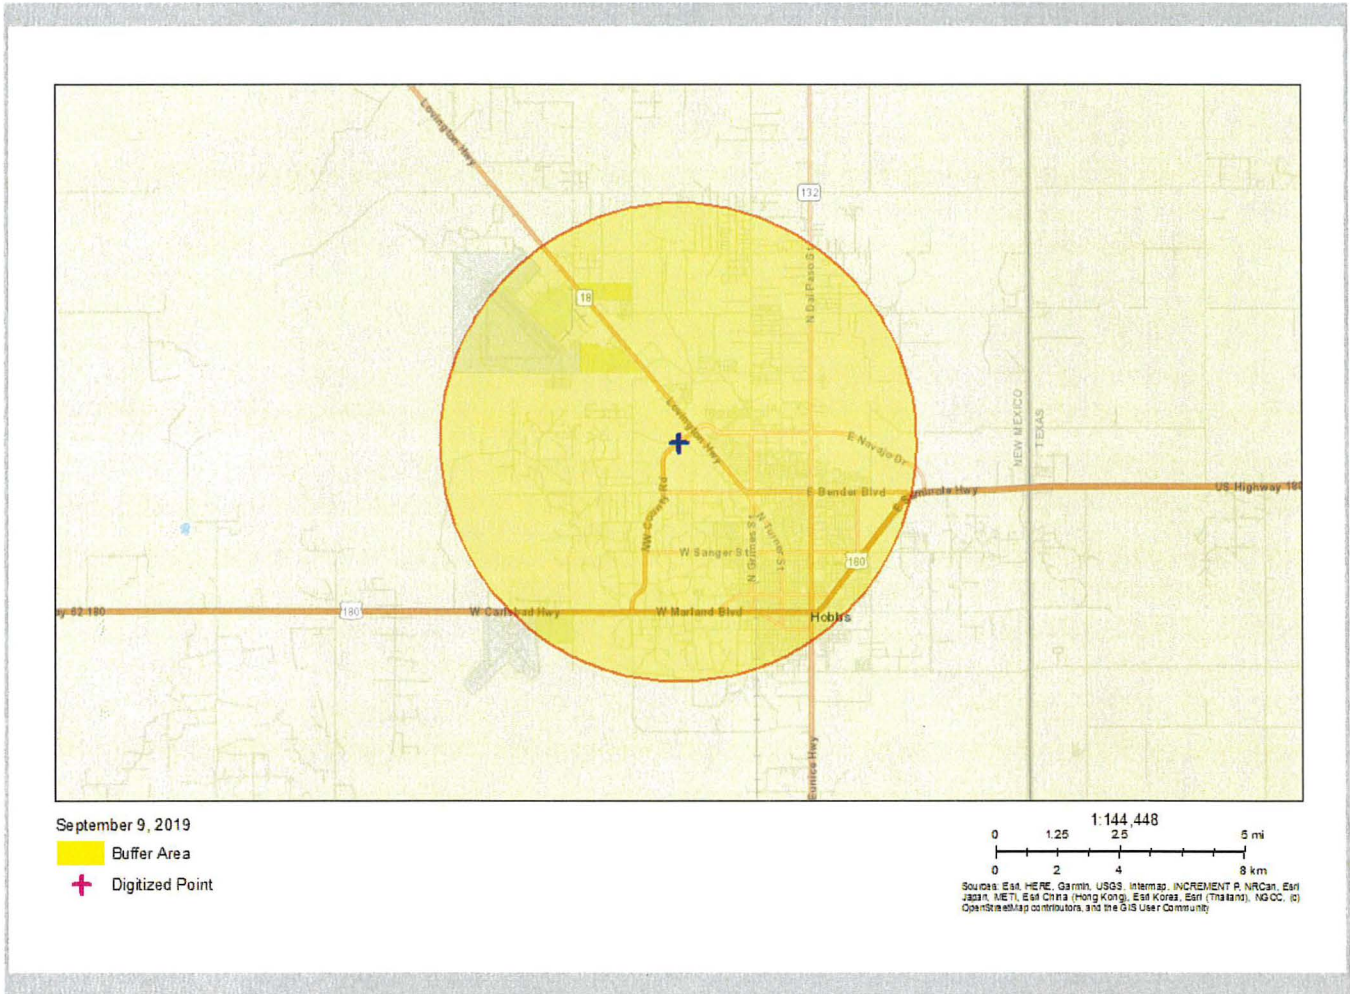

The Bureau will consider requests from members of the affected community for additional LEP services.
