# Road Map Meeting - Oct. 20th

## for Gold King Mine Spill 's Long Term-Effects on New Mexico

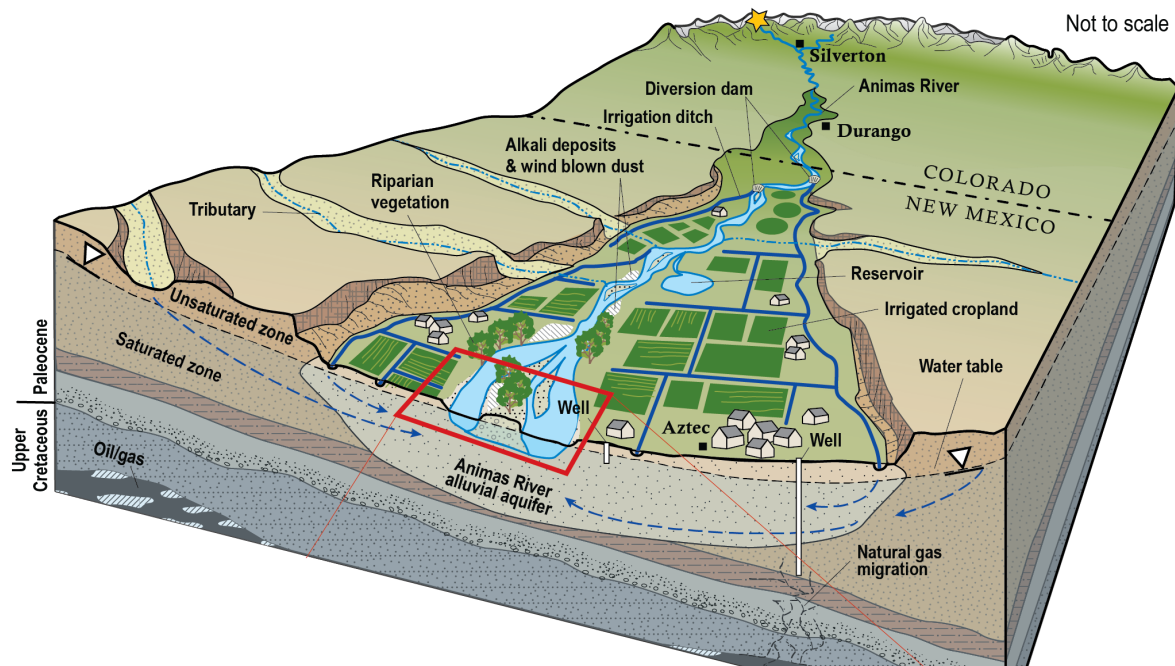

**Bring your knowledge. Bring your neighbors.  
Bring your concerns and questions. Help build the Road Map.**

**Long-Term Impact Review Team:** With your help, the State of New Mexico is developing the comprehensive **Road Map** forward, to ensure that scientific attention and oversight is provided for water, sediment, agriculture, health, and wildlife, after three million gallons of contaminated mine wastewater flowed through the Animas and San Juan Rivers leaving behind a trail of heavy metals deposited into the rivers' ecosystems.

**Long-Term Citizen Advisory Committee:** Interested participants will also learn how to express interest to join the Citizen Advisory Committee which will work together with the technical Long-Term Impact Review Team to ensure that citizen and stakeholder concerns continue to be carried forward.

## Tuesday, Oct. 20th, 5:30 - 8 p.m.

San Juan College, Henderson Fine Arts Center  
Rooms 9008 & 9010, 4601 College Boulevard, Farmington

The Animas and San Juan River ecosystems affect the water, sediment, health, agriculture, wildlife, and other aspects of the Northern New Mexico region.
