

## **AGUA FRIA LANDFILL CLOSURE PROJECT**

**Location and Directions:** In the Arroyo de los Frijoles, adjacent to the east side of the Old Santa Fe County Landfill. From Albuquerque, Go north on I 25. Take the NM 599 EXIT and go north on NM 599 past Rodeo RD and turn left (west) on Co Rd 62. Except for the first 0.1 miles, it is a dirt road. Go approximately 1.2 miles and park vehicle adjacent to the arroyo. Walk south for approximately 500 feet. The bale project will be on the right side of the arroyo. See attached google map.

**Approximate Date of Construction:** 1999

**Number of bales / tires used:** 370 bales

**Design information** Designed by Bohannan Huston, Inc. Tire bales were stacked 5 rows deep. They were wrapped with wire and tied together. Rows were buried to prevent scouring under the bales; only the top three rows are visible. The wall was finished with shotcrete. Approximately 37,000 tires were utilized in the project.

**Cost** \$83,470.85 including tax (\$71,627.17 for materials & labor + \$11,843.68 for transportation of bales from Albuquerque)

**Other Information:** On 7-6-11, NMED staff visited the site and found it to be in excellent conditions with only a few hair line cracks, no erosion on top or sides, and no crumbling of the shotcrete cover.
