---

Ned,

NMED provisionally approves the HP work plan with the changes described in your response letter, pending the submittal of the revised plan. Thank you for your effort to accommodate our concerns.

**Subject:** RE: Chino HP Work Plan - NMED comments

Pam,

Attached is Chino's response to NMED's comments on the HP work plan. Chino will submit a revised work plan after NMED review of these responses to comments.

Thanks

Hi Ned,

Attached is a copy of the comments we are sending to Timothy Eastep on Chino's

Hydrology Protocol Work Plan. Please let us know if you have any questions or comments.

**Subject:** Chino HP Work Plan

Hello Pam,

Attached is a file that contains the text portion of a work plan titled "*Application of the Hydrology Protocol to STSIU Drainages Work Plan.*" The file for the complete document with figures is too large to email, and I plan to send you a subsequent email with an FTP link that will allow you to download the entire document. A hard copy of this submittal will also arrive at your offices via mail.

Chino looks forward to NMED's review and approval of this work plan. We anticipate that NMED may have questions and comments during review of the document, and I will contact you in the near future to determine if NMED staff would like to have a teleconference and/or a face-to-face meeting with Chino and ARCADIS staff to discuss any questions or comments.

We appreciate ED's timely review of this document, as Chino would like to begin the dry season survey in June ahead of the monsoon season.

Please contact me if you have any questions.

Thank you.
