

*“I see that the deadline for submittal of proposals for Sierra Ice & Water was extended. I didn’t see anything different in the project information sheet or proposal specifications – is the deadline extension because people had trouble downloading the information file?”*

Fewer than three proposals were obtained by the deadline in the solicitation. As required by 20.5.17.15.D.2 NMAC, the department is soliciting additional proposals pursuant to 20.5.17.15.C.1 NMAC.

If fewer than three responsive proposals are obtained after two attempts, the department may select a proposal following the procedures in 20.5.17.15, provided the technical merit is acceptable for the proposed work.

The new rules effective June 15, 2009 are available at <http://www.nmenv.state.nm.us/ust/draftregs.html>.
