Subject: public comment

Dear Mr. Bearzi, Thank you for the opportunity to comment on the new draft for WIPP's permit. I am absolutely opposed to any loosening of regulations regarding transportation and storage of nuclear or other hazardous waste to WIPP. I am opposed to all changes regarding inspection of containers traveling to WIPP because any lighter inspection standards will increase the probability of dangerous and unsuitable waste entering the storage facility. I am opposed to any consideration of drilling for oil or any other mineral resource in the vicinity of WIPP because it will destabilize the environment that is critical to the safety of the storage of waste at WIPP. Please don't allow lighter standards for transport of containers, contents of containers or any other safeguards of hazardous waste storage. Thank you. Sincerely, Becky Peirce
