WHAT'S THE VALUE OF WATER?

There are nearly 400,000 house fires in the U.S. each year, and water that flows from hydrants is our best defense.

Most of us never think about how water gets to us. Luckily, we don't have to. Pumps, treatment plants, and pipes bring us clean water and carry away wastewater. All day, every day.

But our water systems are aging. They need investment to continue delivering life's most essential resource.

Water—Essential. Reliable. Invaluable.
