

LEGAL NOTICE

For

Air Quality Operating Permit

for La Jara Compressor Station of Williams Four Corners LLC

Williams Four Corners LLC at 1755 Arroyo Drive; Bloomfield, NM 87413 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its La Jara Compressor Station. The owner of this plant is Williams Four Corners LLC. The exact location of the facility is at latitude 36 deg, 49 min, 2 sec and longitude -107 deg, 29 min, 32 sec., Datum: NAD83. To aid in locating this facility, the approximate location is 25 miles NE of Bloomfield in Rio Arriba County, New Mexico. This application file has been assigned an Operating Permit Number P023-R3 and TEMPO Agency Interest ID No. 1010.

Previously, the facility received an air quality construction permit and is in operation. The main purpose of the facility is to compress natural gas through underground natural gas pipelines using natural gas fired combustion turbines.

This operating (Title V or TV) permit application is for a permit renewal. Per 20.2.70.401.C.(4) NMAC, this permitting action revises and updates the TV permit for changes made in construction permit revisions (i.e.; new source review or NSR). NSR 339-M6 updated equipment and applicable requirements, including updates to some unit model and serial numbers. 339-M6 removed five glycol dehydrators and their corresponding flares, revised condensate tank throughput, emissions, truck loadout, and startup-shutdown-maintenance (SSM), and malfunction emissions. This TV renewal is also incorporating permit 339-M7 revisions, which include increased volatile organic compound (VOC) emissions from SSM, fugitive equipment leaks, and from gas line maintenance activities.

The emissions, as established in NSR Permit 339-M7, and brought forward into this permit are as follows. Parentheses note changes in emissions from previous operating permit – P023-R2. Emissions are expressed in tons per year (tpy). Nitrogen Oxides (NO_x) at 269.2 tpy (-42.4); Carbon Monoxide (CO) at 184.2 tpy (-14.8); Volatile Organic Compounds (VOC) at 310.4 tpy (-53.6); Sulfur Dioxide (SO₂) at 2.6 tpy (no change); Total Suspended Particulate Matter (TSP) at 5.1 tpy (-0.2); Particulate Matter 10 microns or less (PM₁₀) at 5.1 tpy (-0.2), Particulate Matter 2.5 microns or less (PM_{2.5}) at 5.1 tpy (-0.2); and greenhouse gas (CO_{2e}) > 75,000 tpy.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance.

The NMED has made a preliminary determination that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 7, 61, 70, 71, 72, 73, 74, 77, and 82; 40 CFR 50; 40 CFR 60 Subparts A, and GG; 40 CFR 63 Subparts A, ZZZZ, and CCCCC; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before January 12, 2017.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P023-R3 by contacting Jim Nellessen at the New Mexico Environment Department, Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the

Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816. The Department contact in Santa Fe is Jim Nellesen at 505-476-4315. Este es un aviso de la Agencia de Calidad de Aire del Departamento de Medio Ambiente de Nuevo México, acerca de las emisiones producidas por un establecimiento en esta área.
