

AMERICAN SOCIETY OF SAFETY PROFESSIONALS

2019 Professional Development Conference

April 23 – 24, 2019 @ Sandia Casino Conference Center in ABQ

New Mexico Chapter of the American Society of Safety Professionals Proudly Presents:

43rd Annual 2019 Professional Development Conference

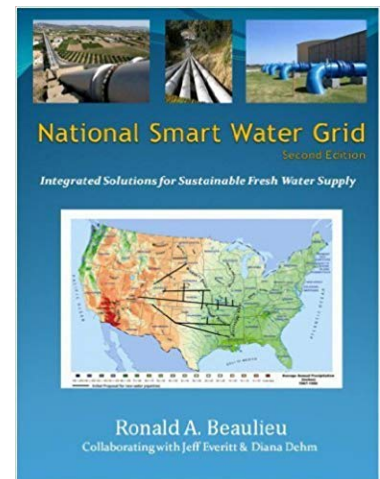

Keynote Speaker Mr. Ronald Beaulieu

President and Chief Executive Officer of the National Freshwater Foundation, Mr.

Beaulieu, is the author of “*National Smart Water Grid: Integrated Solutions for Sustainable Fresh Water Supply.*”

The National Smart Water Grid project seeks to collect floodwaters above Action Stage during flood events on the Mississippi River and her tributaries and then pump the water through pipelines to the Colorado River.

The National Smart Water Grid works to create a healthier country and sustainable communities through the erection and maintenance of public infrastructure involving water works. The National Freshwater Foundation conducts interdisciplinary research and partners with stakeholders to produce solutions that advance environmental protection, economic development, and social equity—nationally.

The National Freshwater Foundation envisions a nation where the sustainable fresh water needs of all people are met, where fresh water resources are managed sustainably and nature is protected, and where conflicts over water resources are resolved in a peaceful and democratic fashion via a workable solution.

Copies of the “*National Smart Water Grid: Integrated Solutions for Sustainable Fresh Water Supply,*” are available for purchase at: <https://www.hipstamp.com/listing/national-smart-water-grid-integrated-solutions-for-fresh-water-supplies/25469253> or from Mr. Beaulieu directly at: beaulieur@cox.net.
