This checklist applies to general industry workplaces

☐ Are only qualified persons allowed to work on electrical equipment and are they familiar with Oregon OSHA electrical safety rules?

☐ Are lockout/tagout procedures required when electrical equipment is being serviced?

☐ Are portable hand-held electrical tools and equipment grounded or double-insulated?

☐ Are electrical appliances – such as refrigerators, coffee pots, vacuum cleaners, polishers, and vending machines – grounded?

☐ Do extension cords have a ground prong?

☐ Are ground-fault circuit interrupters, which are not a part of the permanent wiring of the building, installed on 125-volt, single phase, 15-, 20-, and 30 ampere receptacles?

☐ If not, do you have an assured equipment-grounding program?

☐ Do you repair or replace damaged wiring or frayed cords promptly?

☐ Do flexible cords or cables have strain relief at plug ends and is the cord jacket securely held in place?

☐ If you work in damp or wet areas, are your electrical tools and equipment approved for that kind of work?

☐ Are metal ladders prohibited from use in areas where there could be exposure to energized parts of equipment, fixtures, or circuit conductors?

☐ Are all disconnecting switches labeled to indicate their use or the equipment they serve?

☐ Are energized parts of electrical equipment operating at 50 volts or more enclosed in approved cabinets?

☐ Is there sufficient access and working space around all electrical equipment?

☐ Are all unused openings in breaker boxes appropriately plugged or covered?

☐ Is the use of each circuit breaker properly labeled?

☐ Do switches, receptacles, and junction boxes have tight-fitting covers or face plates?

☐ Are employees forbidden from working within 10 feet of high-voltage (over 600 volts) lines?
